About US

At Nextsense, we specialize in bespoke software development, focusing on creating tailored solutions that drive business transformation and growth. Our team of highly skilled professionals is committed to leverage the latest technologies to revolutionize operations across various sectors including finance, agriculture, healthcare and logistics.

We take the time to understand your unique business challenges and opportunities, which allows us to deliver custom solutions that are not only effective but also sustainable and scalable. Whether you are looking to streamline processes, enhance security or capture new market opportunities, we are here to help you achieve your objectives with precision and efficiency.

Join the myriad of clients who have transformed their business with our innovation applications. let Nextsense help you navigate the complexities of the digital landscape and unlock new possibilities with our expertly designed software solutions.

NextSense Development Services

At Nextsense, we provide a comprehensive suite of services to guide you from the initial concept to a fully functional digital product. Our expert team is dedicated to delivering high-quality, customized solutions that meet your unique business needs and drive success.

Industries we work in.

Our experience of creating solutions for particular industries has allowed us to grow in-house expertise which we share with our customers. We provide consultations on every stage of the project development and build products following the best industry standards.

 Banking & Financial Services	 E- Commence Marketplace	 Real Esate	 Healthcare	 Government & Public Sector
 Retail	 Logistics	 Telecommunications	 Agriculture	 Blockchain
 Tokenization & RWA	 Education	 Travel & Hospitality	 Automotive	 Sports

Custom Software Development

We specialize in creating high-performing, tailor-made software solutions for businesses that require more than standard applications. Our custom software development services ensure your specific requirements are met, providing robust and scalable solutions that enhance operational efficiency and drive growth.

Online Marketplace Development

Whether you envision a B2B, B2C, or P2P marketplace, we have the expertise to bring your idea to life. We develop user-friendly and engaging platforms that facilitate seamless transactions and interactions, ensuring your marketplace becomes a preferred choice for users.

MVP Development

For startups aiming to validate their ideas and minimize costs, our MVP development services are ideal. We build efficient Minimum Viable Products that allow you to test your concept in the market, gather valuable user feedback, and make informed decisions for future development.

SaaS Development

Transitioning your business to the cloud? Our SaaS development services offer cost-effective and highly scalable cloud-based solutions. We help you become an industry leader by delivering innovative SaaS applications that improve accessibility, reduce costs, and enhance user experiences.

Mobile Development

Planning to create a mobile app? We offer comprehensive mobile development services that balance price, quality, and requirements. Our team ensures that your mobile app is innovative, user-friendly, and meets your business objectives, providing a competitive edge in the mobile market.

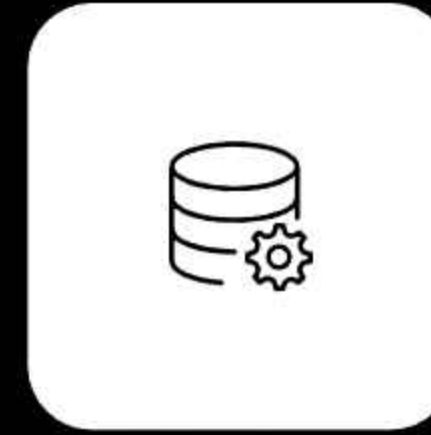

Augmented Reality (AR) and Virtual Reality (VR) Solutions

Revolutionize user experiences with our AR and VR solutions, creating immersive environments for training, marketing, and entertainment.

UI/UX Design

Our UI/UX design team is dedicated to creating intuitive and engaging user experiences. We focus on delivering designs that are understandable, consistent, and enjoyable, ensuring that your solution is user-centric and visually appealing.

Oracle-Based Services

Leverage our Oracle-based services to optimize your business operations with advanced database management, analytics, and application development solutions.

DevOps Services

To optimize your IT processes, our DevOps services offer experienced solutions that reduce costs and increase effectiveness. We provide continuous integration and delivery, infrastructure as code, and monitoring services to enhance the efficiency and reliability of your IT infrastructure.

Digitalization & Transformation

Accelerate business efficiency and innovation through our comprehensive digital transformation services, which streamline processes and integrate cutting-edge technologies.

Cloud Services

Enhance your business flexibility and scalability with our robust cloud services, offering tailored solutions for storage, computing, and application hosting on secure cloud platforms.

Managed Services

Entrust your IT operations to our managed services, ensuring optimal performance, proactive monitoring, and continual maintenance by industry experts.

Smart Services (Smart City platforms, smart solutions for various industries)

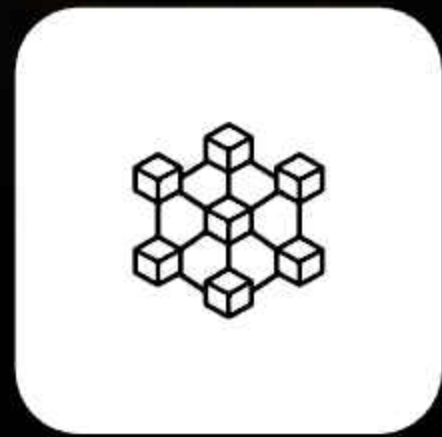

Implement intelligent solutions tailored for urban management and various industries, enhancing efficiency and quality of life through our Smart City platforms and industry-specific technologies.

Cyber Security Services

Protect your digital assets with our comprehensive cyber security services, including risk assessments, incident response, and ongoing monitoring to mitigate threats.

Blockchain Solutions

Secure your transactions and streamline operations with our blockchain solutions, designed to enhance transparency and reduce fraud.

Artificial Intelligence and Machine Learning Solutions

Transform your business with our AI and machine learning solutions, enabling smarter decision-making and automation of complex processes.

Why Should work with us?

Our Process

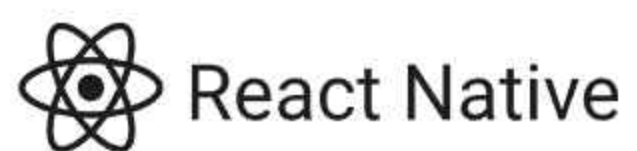

Our clients

Tech stack

Over the years, we have picked a list of tools helping us build high-quality custom products that solve all business challenges. Together with our efficient development process, these tools enable us to keep the cost of custom software development within our clients' expectations.

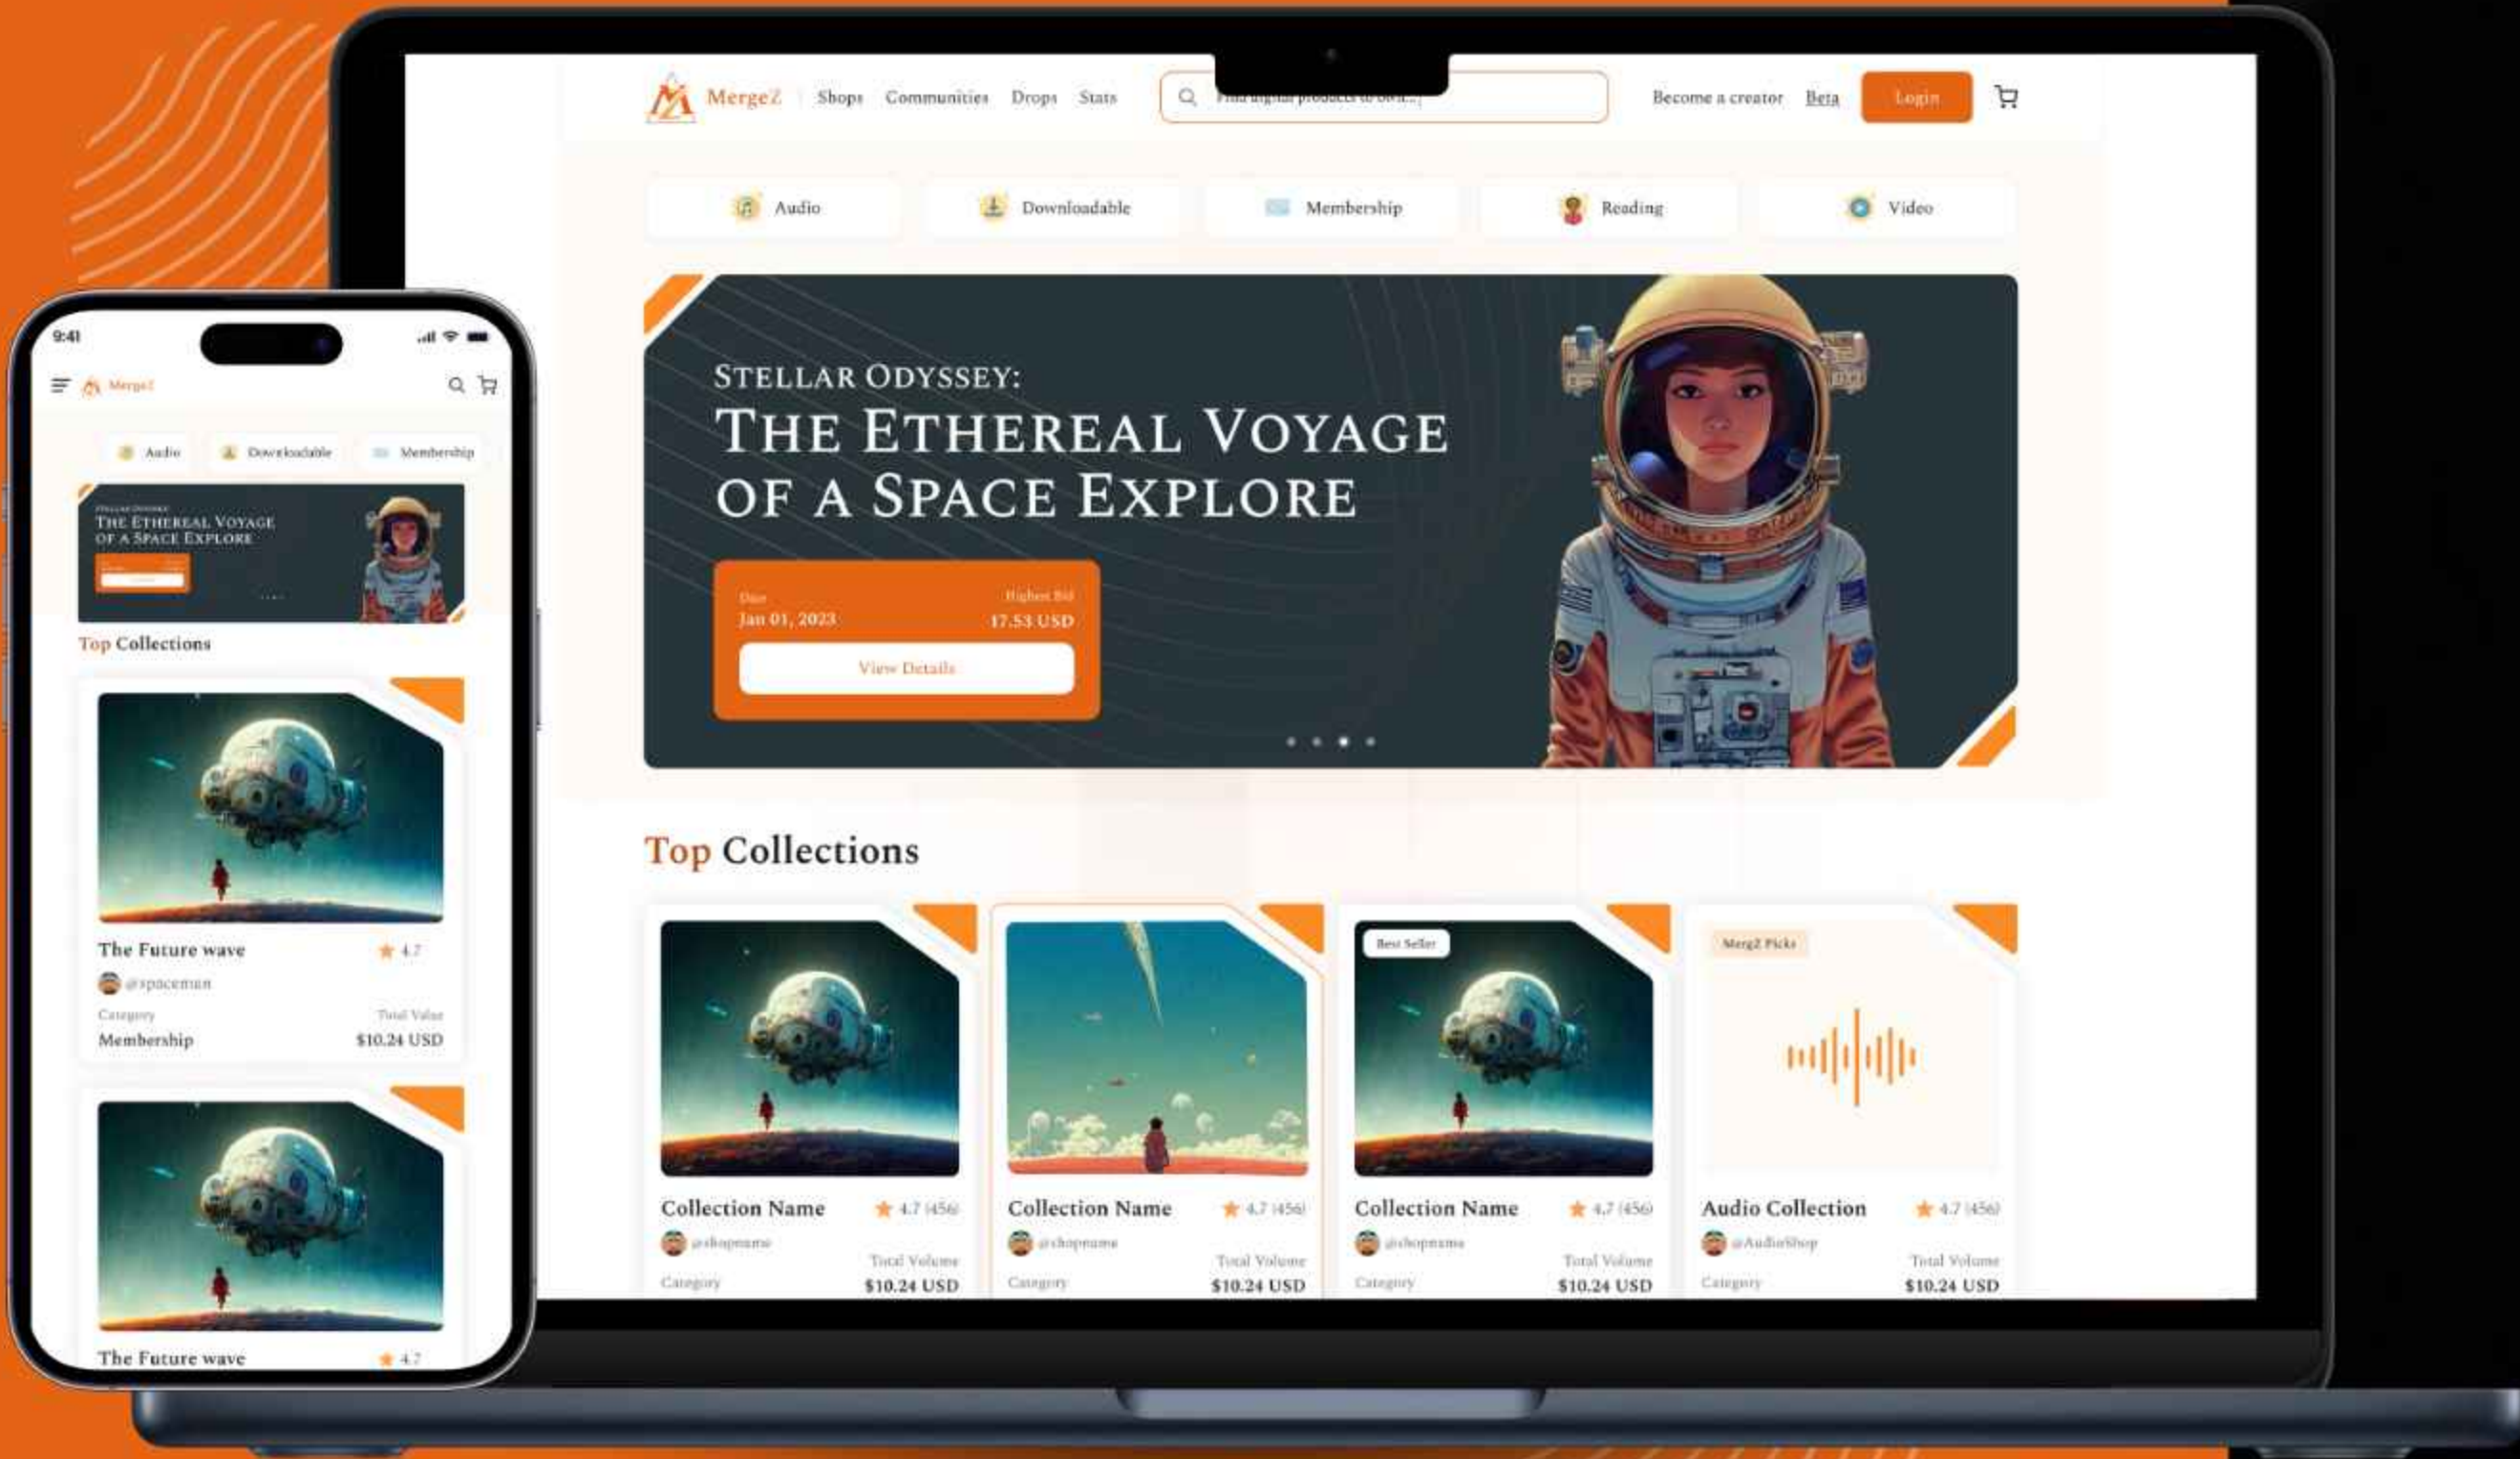

Port folio.

MergeZ: Digital Product Marketplace

MergeZ is a premier full-service digital product marketplace designed for both creators and collectors, integrating cutting-edge technology. Creators can showcase and monetise their digital creations, while collectors can explore and acquire unique, authenticated digital assets.

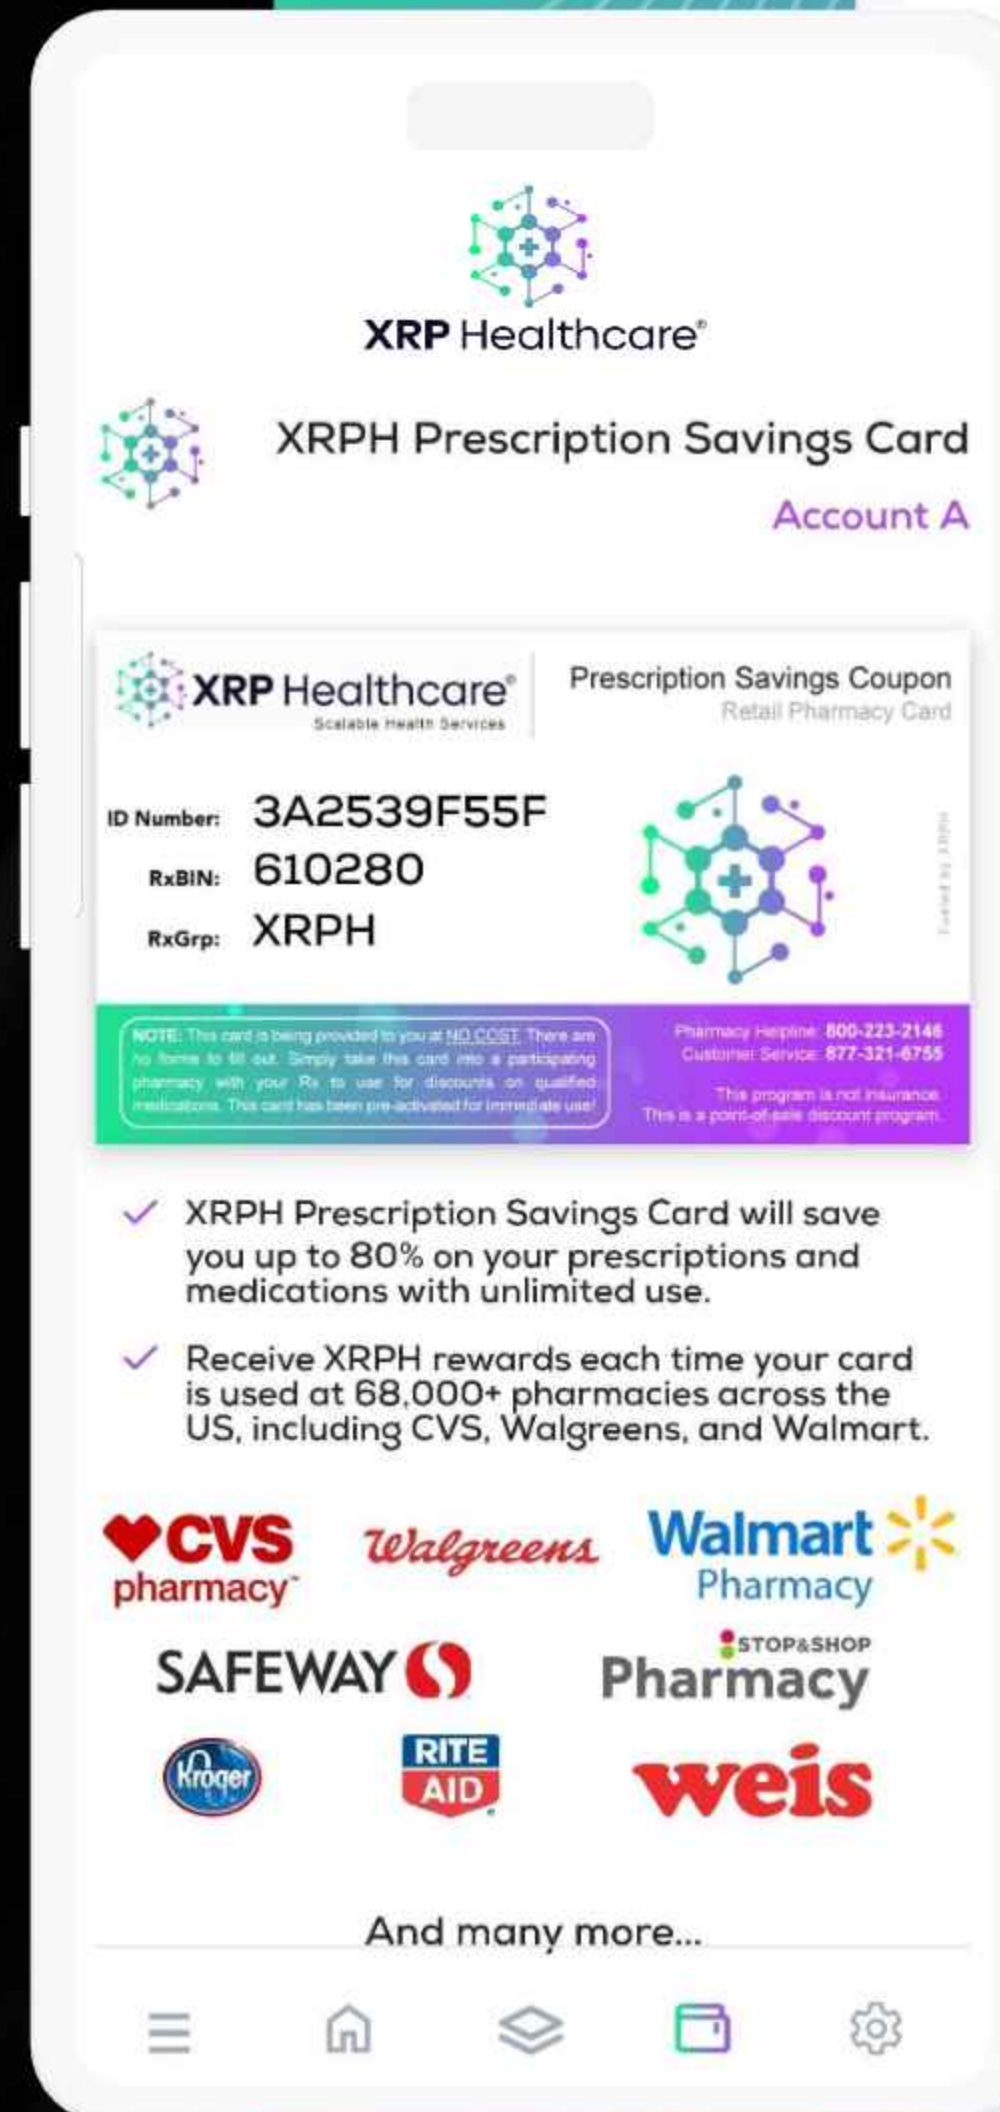

More than a transactional space, MergeZ is an ecosystem where creativity and technology converge, unlocking new opportunities. With advanced technology at its core, MergeZ ensures transparent and secure transactions, safeguarding the integrity of digital products and building trust between creators and collectors.

XRPH: Healthcare & Fintech

XRP Healthcare leverages the XRP Ledger to offer a secure platform for pharmaceutical and healthcare transactions, ensuring anonymity and control. As the first of its kind, it facilitates rapid global payments and improves access to healthcare in emerging markets, while transforming the sector through technology-driven mergers and acquisitions. Users enjoy up to 80% discounts on prescriptions at over 68,000 U.S. pharmacies, earn XRPH rewards, and can efficiently manage funds and track transactions. The app's open-source framework also supports the development of further decentralised applications, enhancing both integration and user experience.

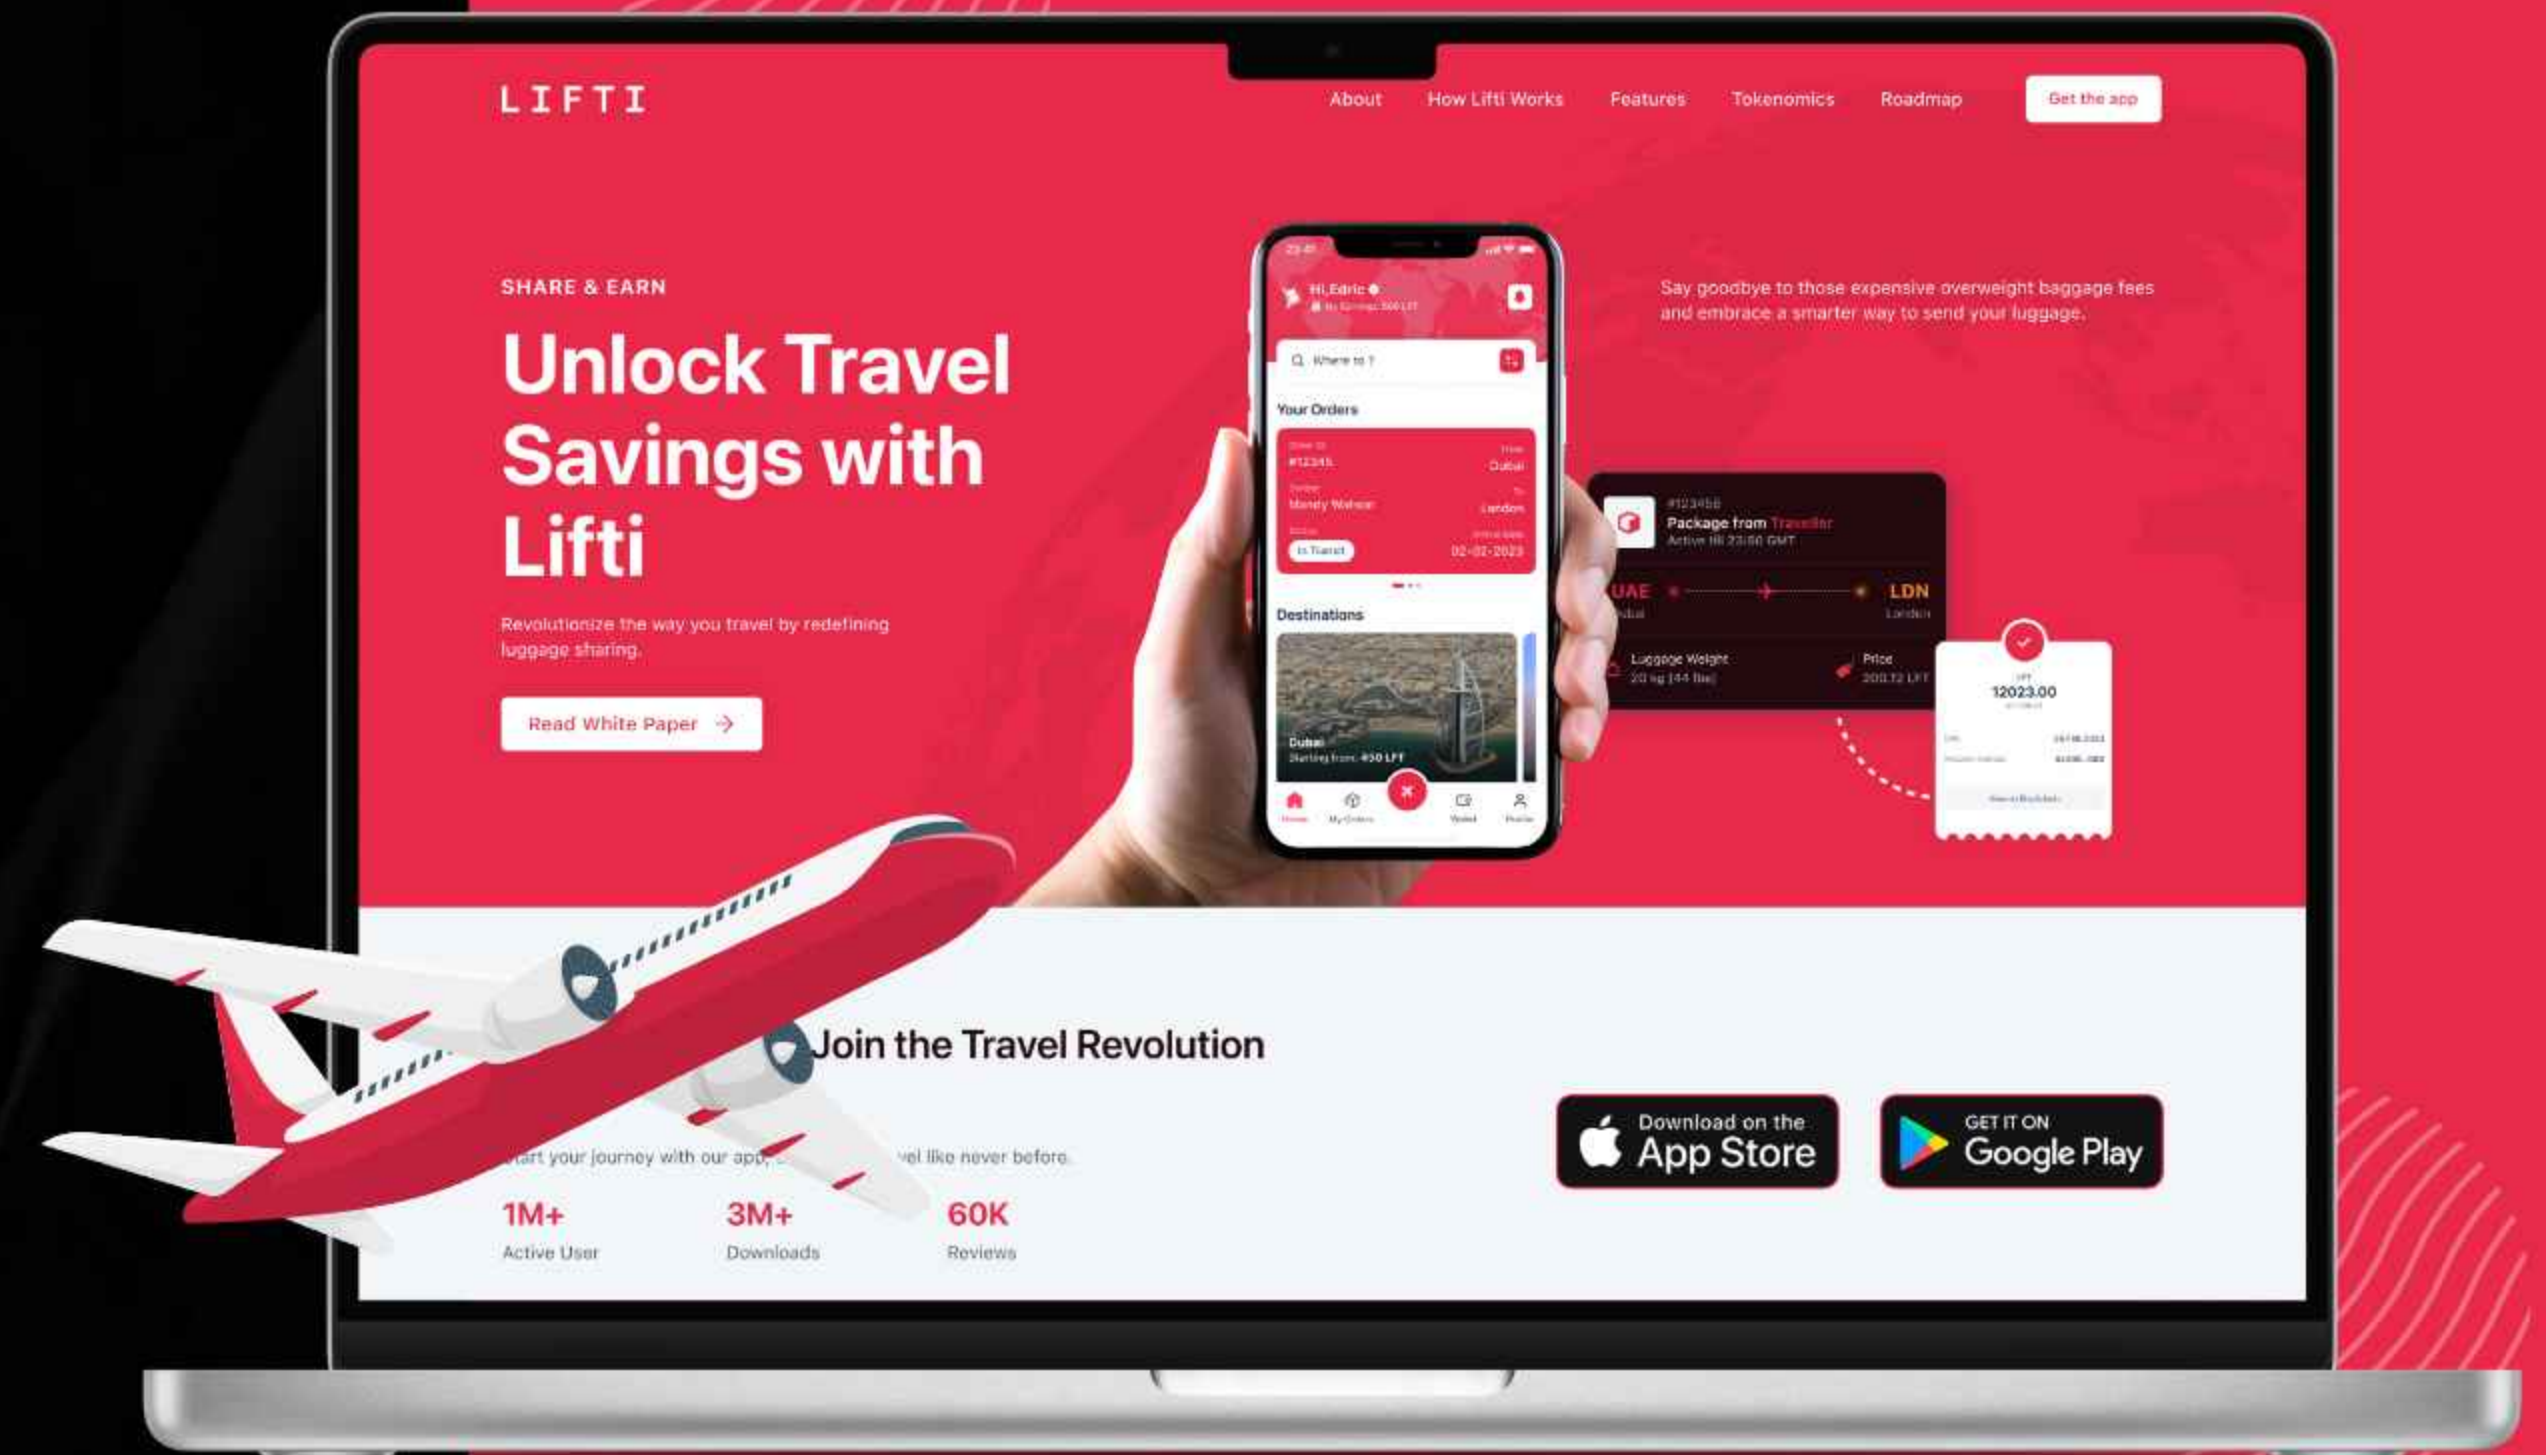

AgScout: AI

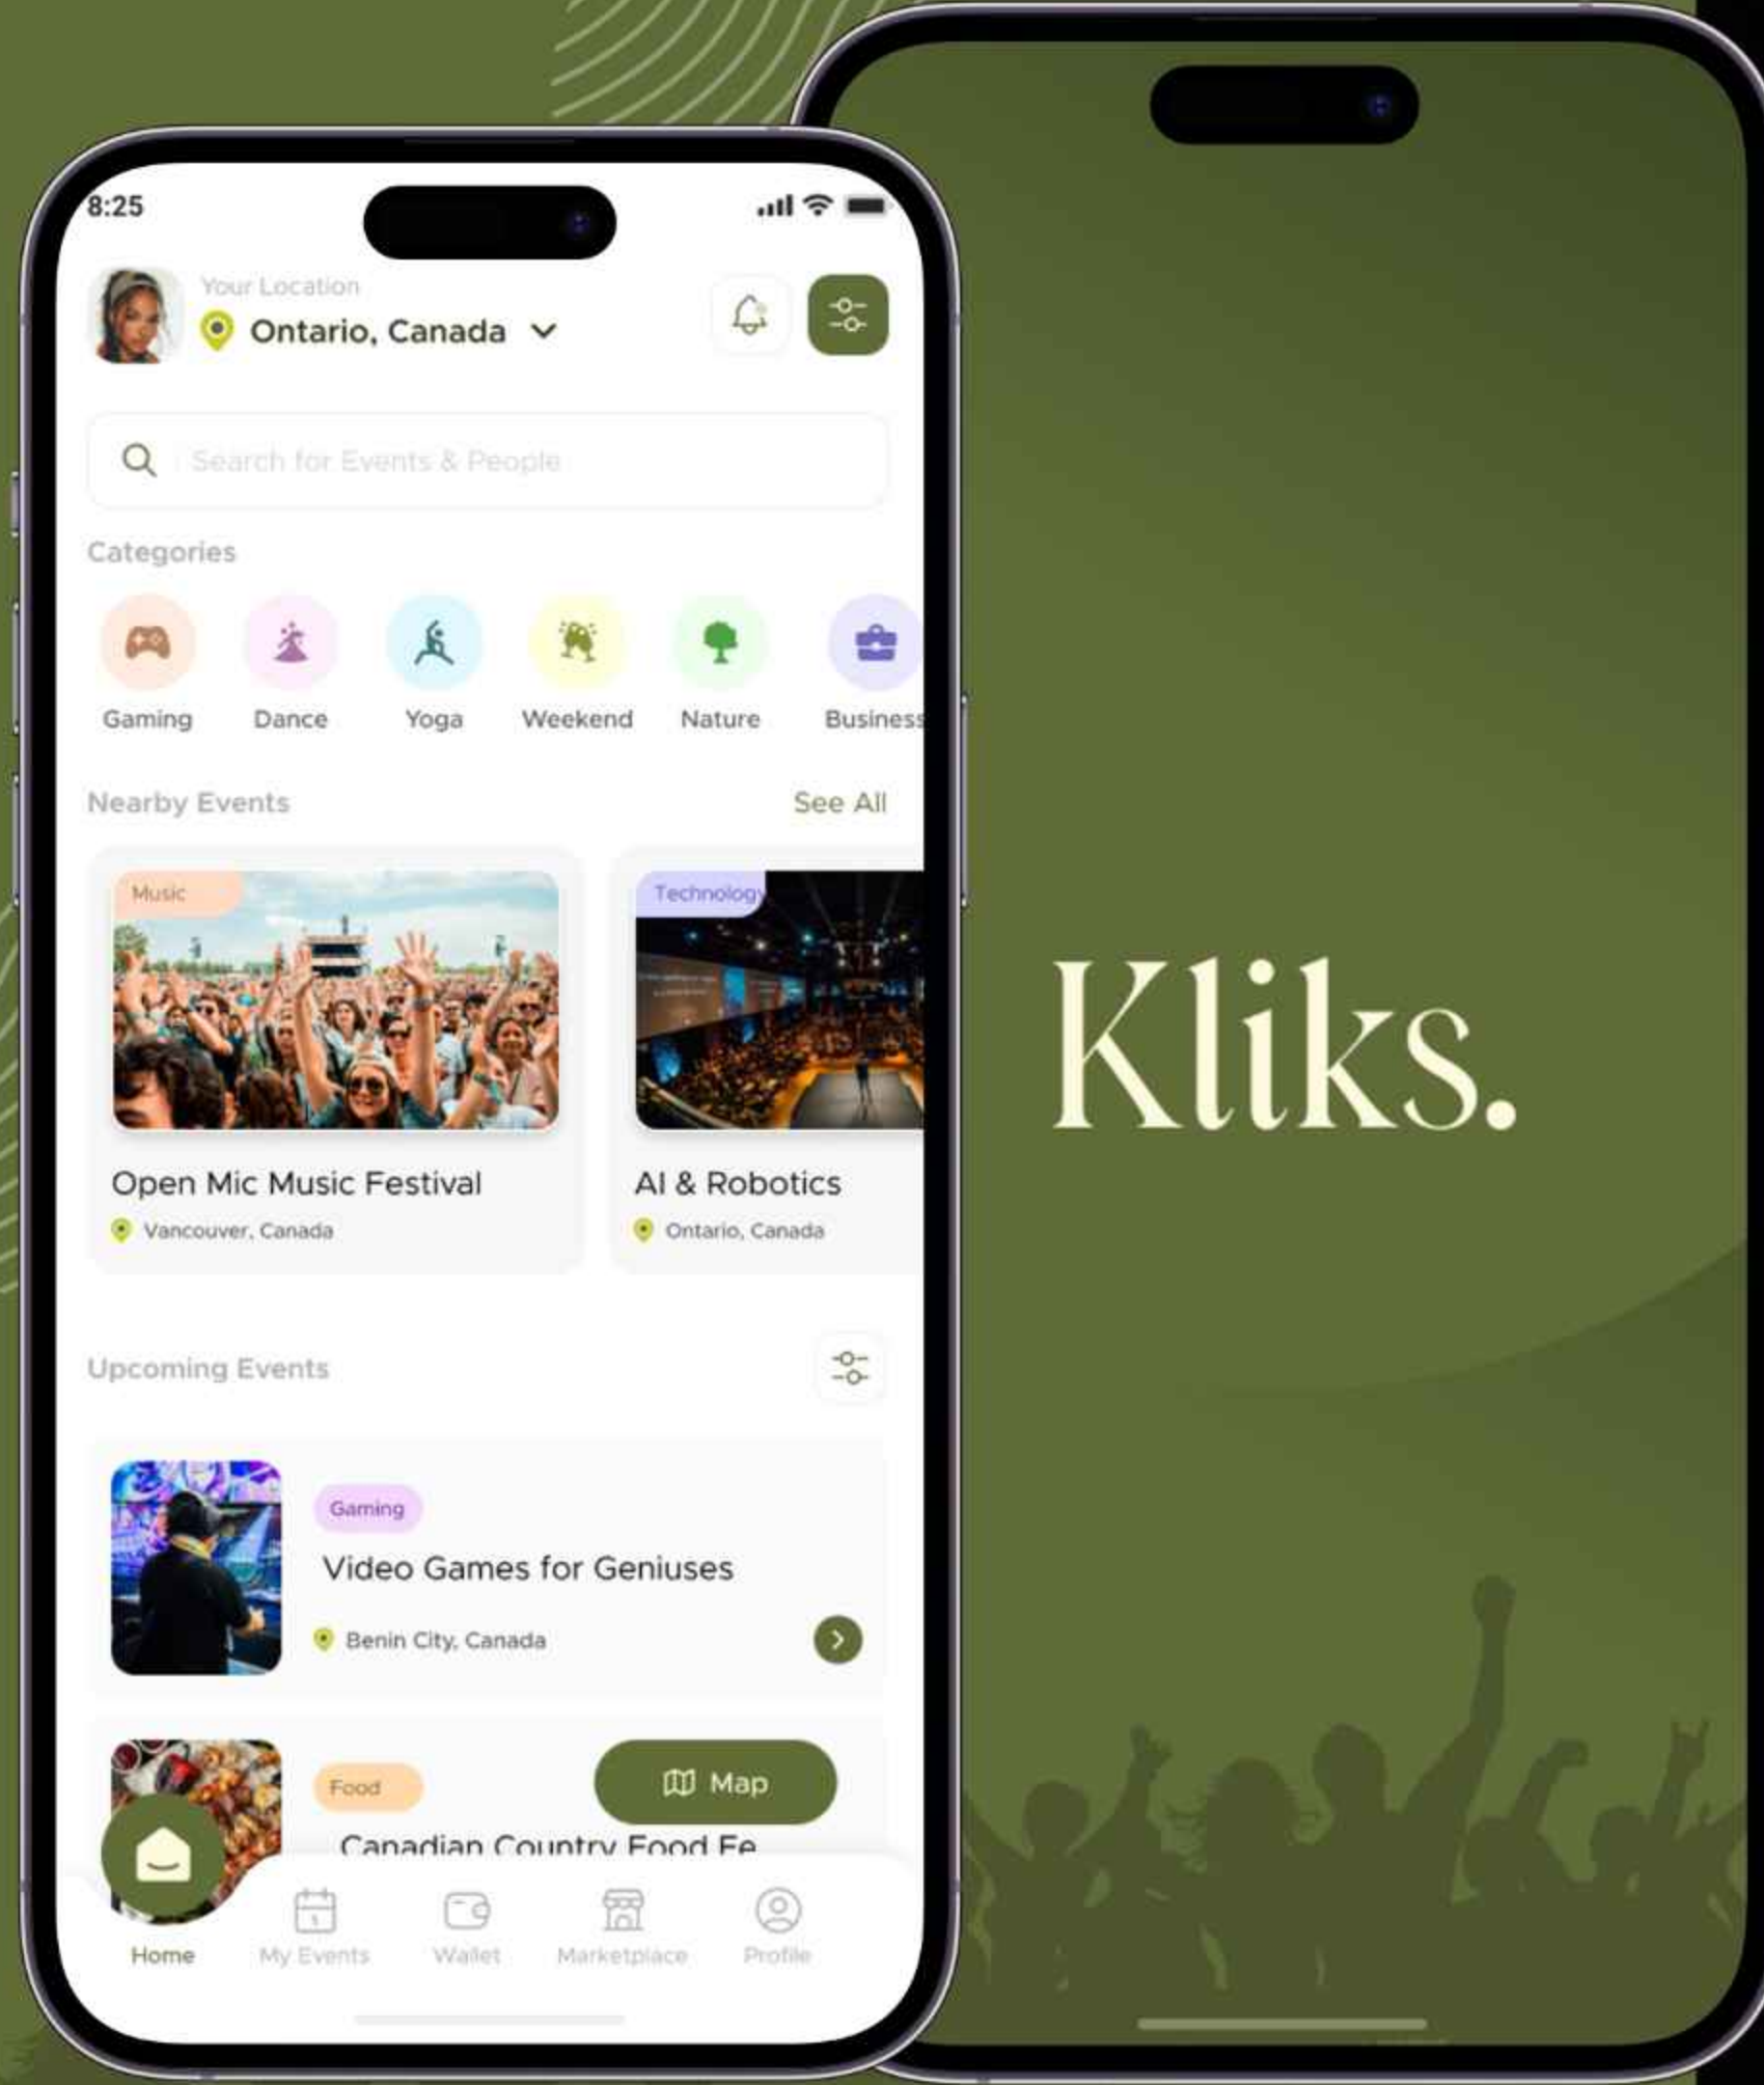

Ag Scout is a React Native app designed for farmers to manage fruit tree and soil data with precision. Integrating advanced AI and machine learning for image detection, it automates the counting of buds and fruits from visuals, significantly enhancing accuracy and reducing manual effort. With its user-friendly, mobile-first interface, Ag Scout is the essential tool for farmers looking to streamline operations and leverage technology for informed decision-making.

Lifti: Travelling & logistics

Lifti is the pioneering luggage-sharing app that's redefining how we travel. Based in Dubai and leveraging cutting-edge technology, Lifti offers a seamless, secure, and sustainable way to manage your luggage needs, whether you're travelling internationally or moving between cities. Additionally, travellers can earn money by transporting luggage for others, making it a beneficial solution for both senders and travellers.

Kliks.

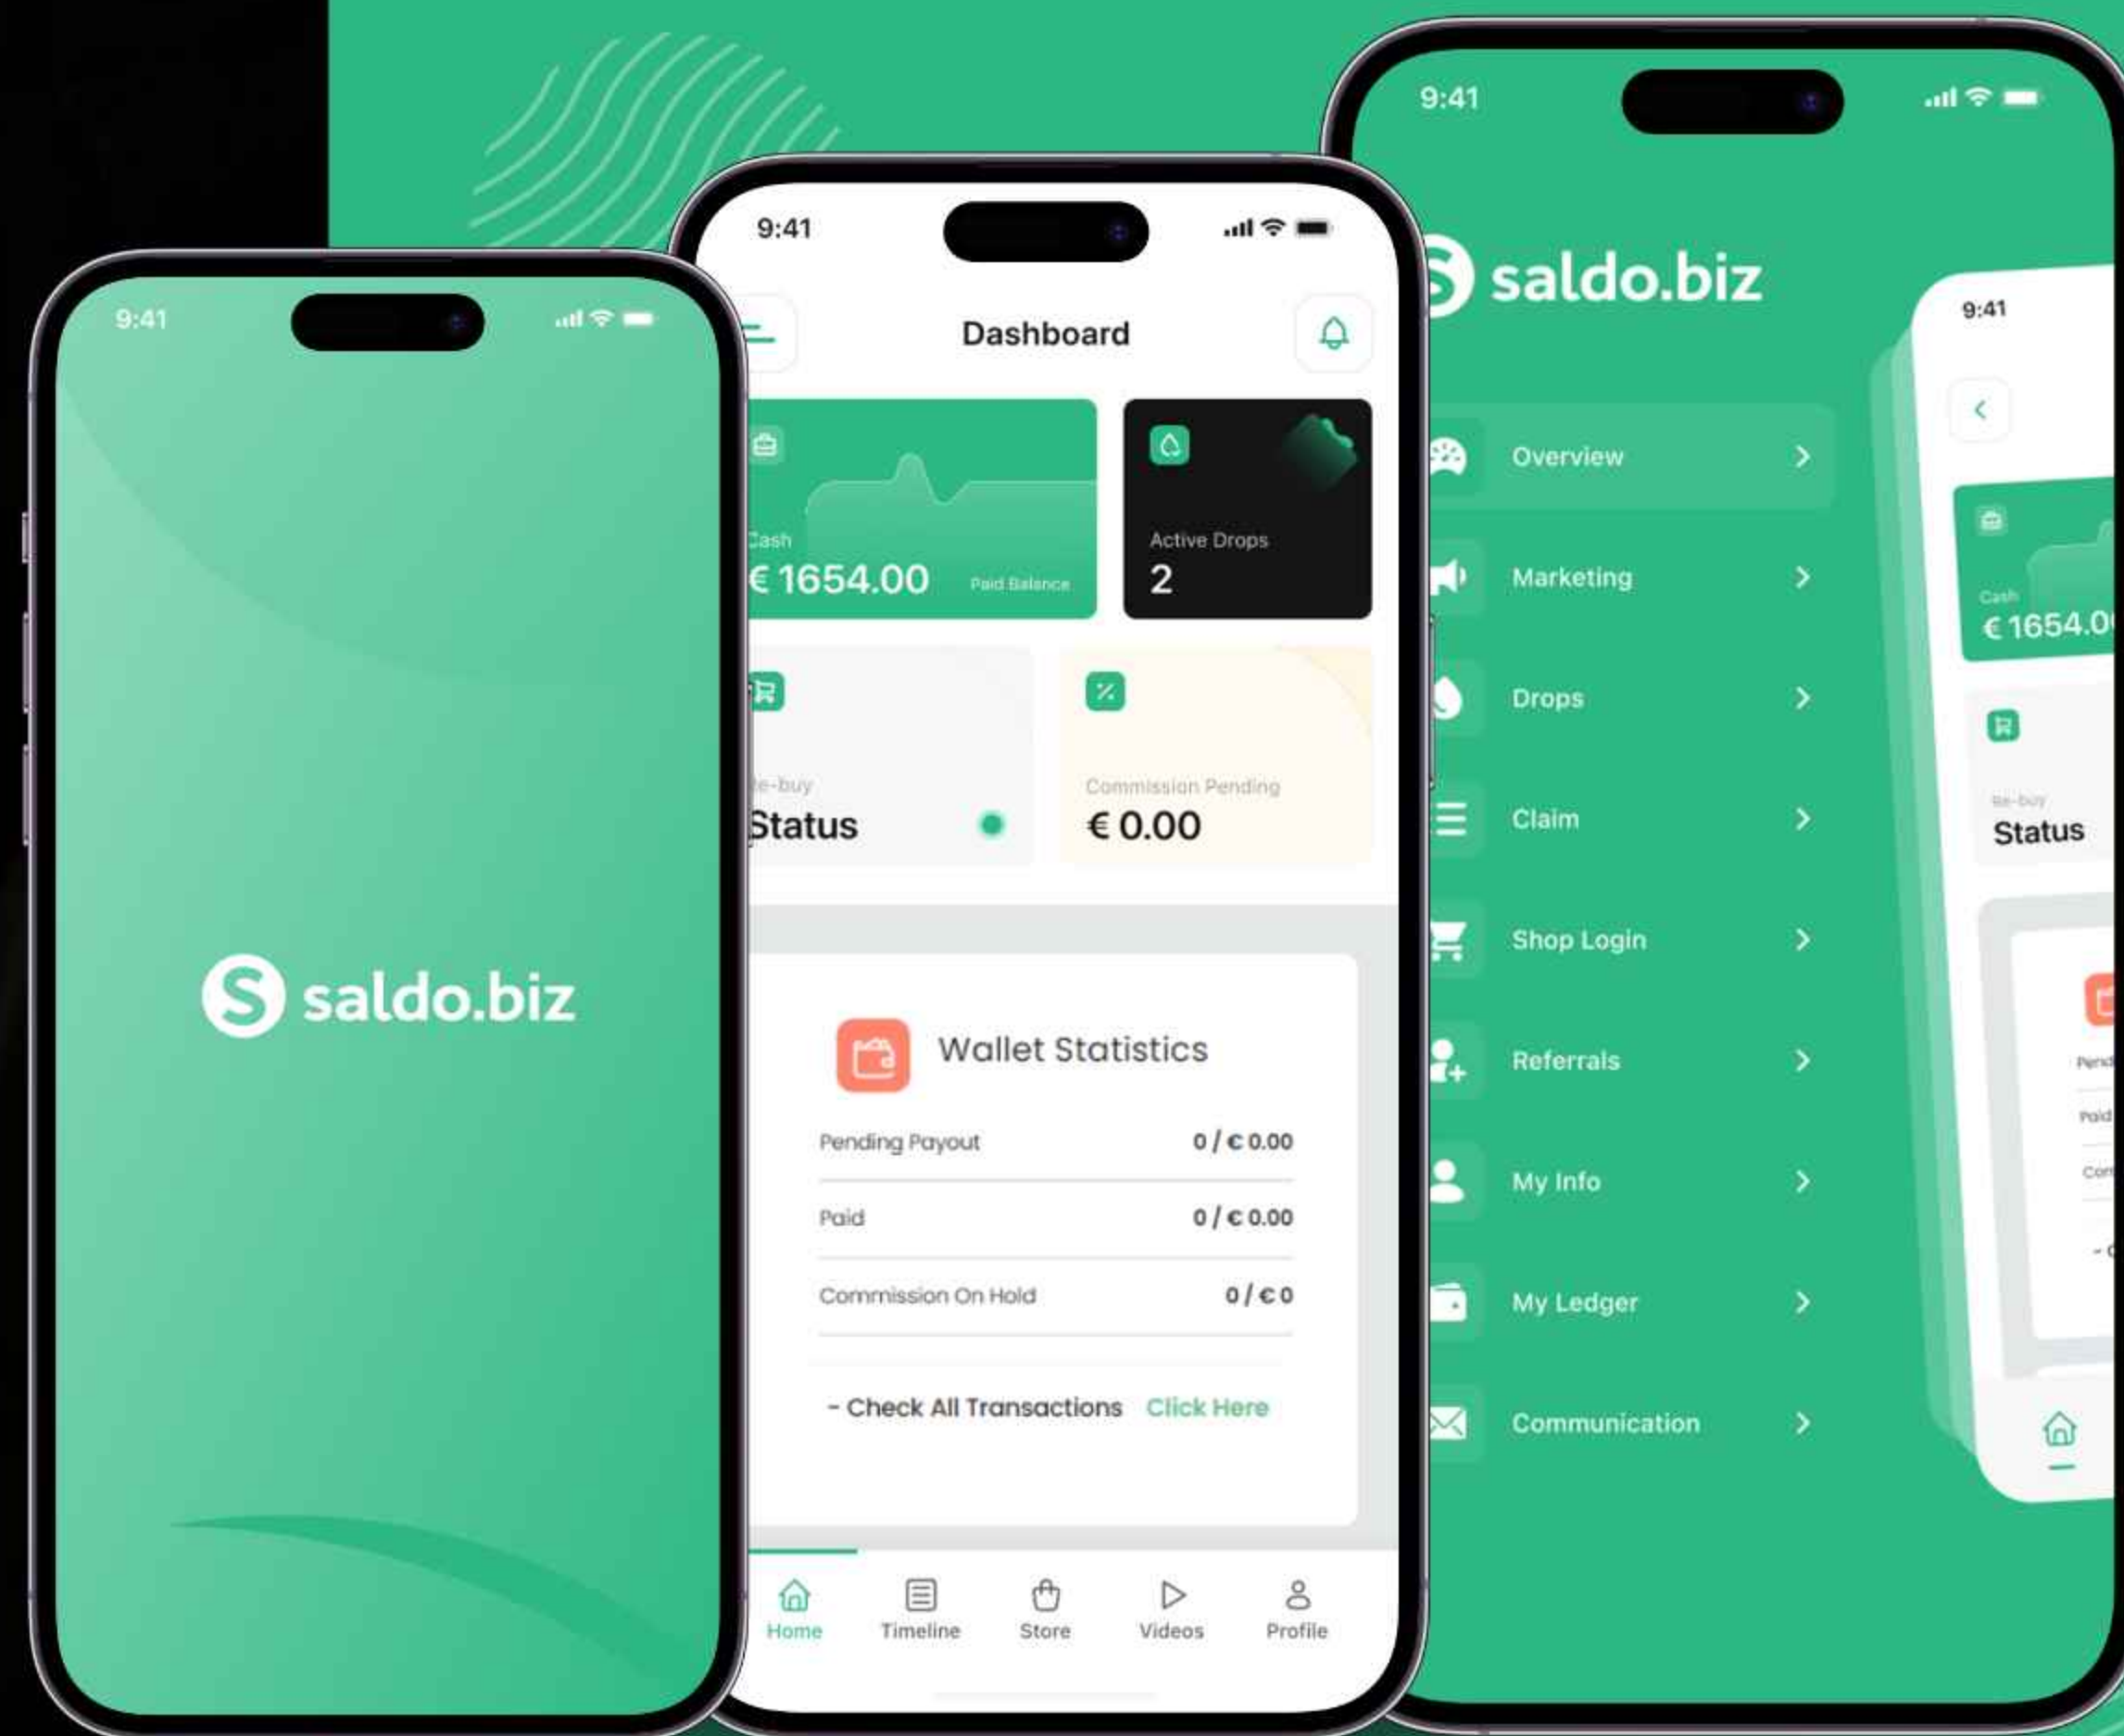

Kliks App: Entertainment & Physical Activity

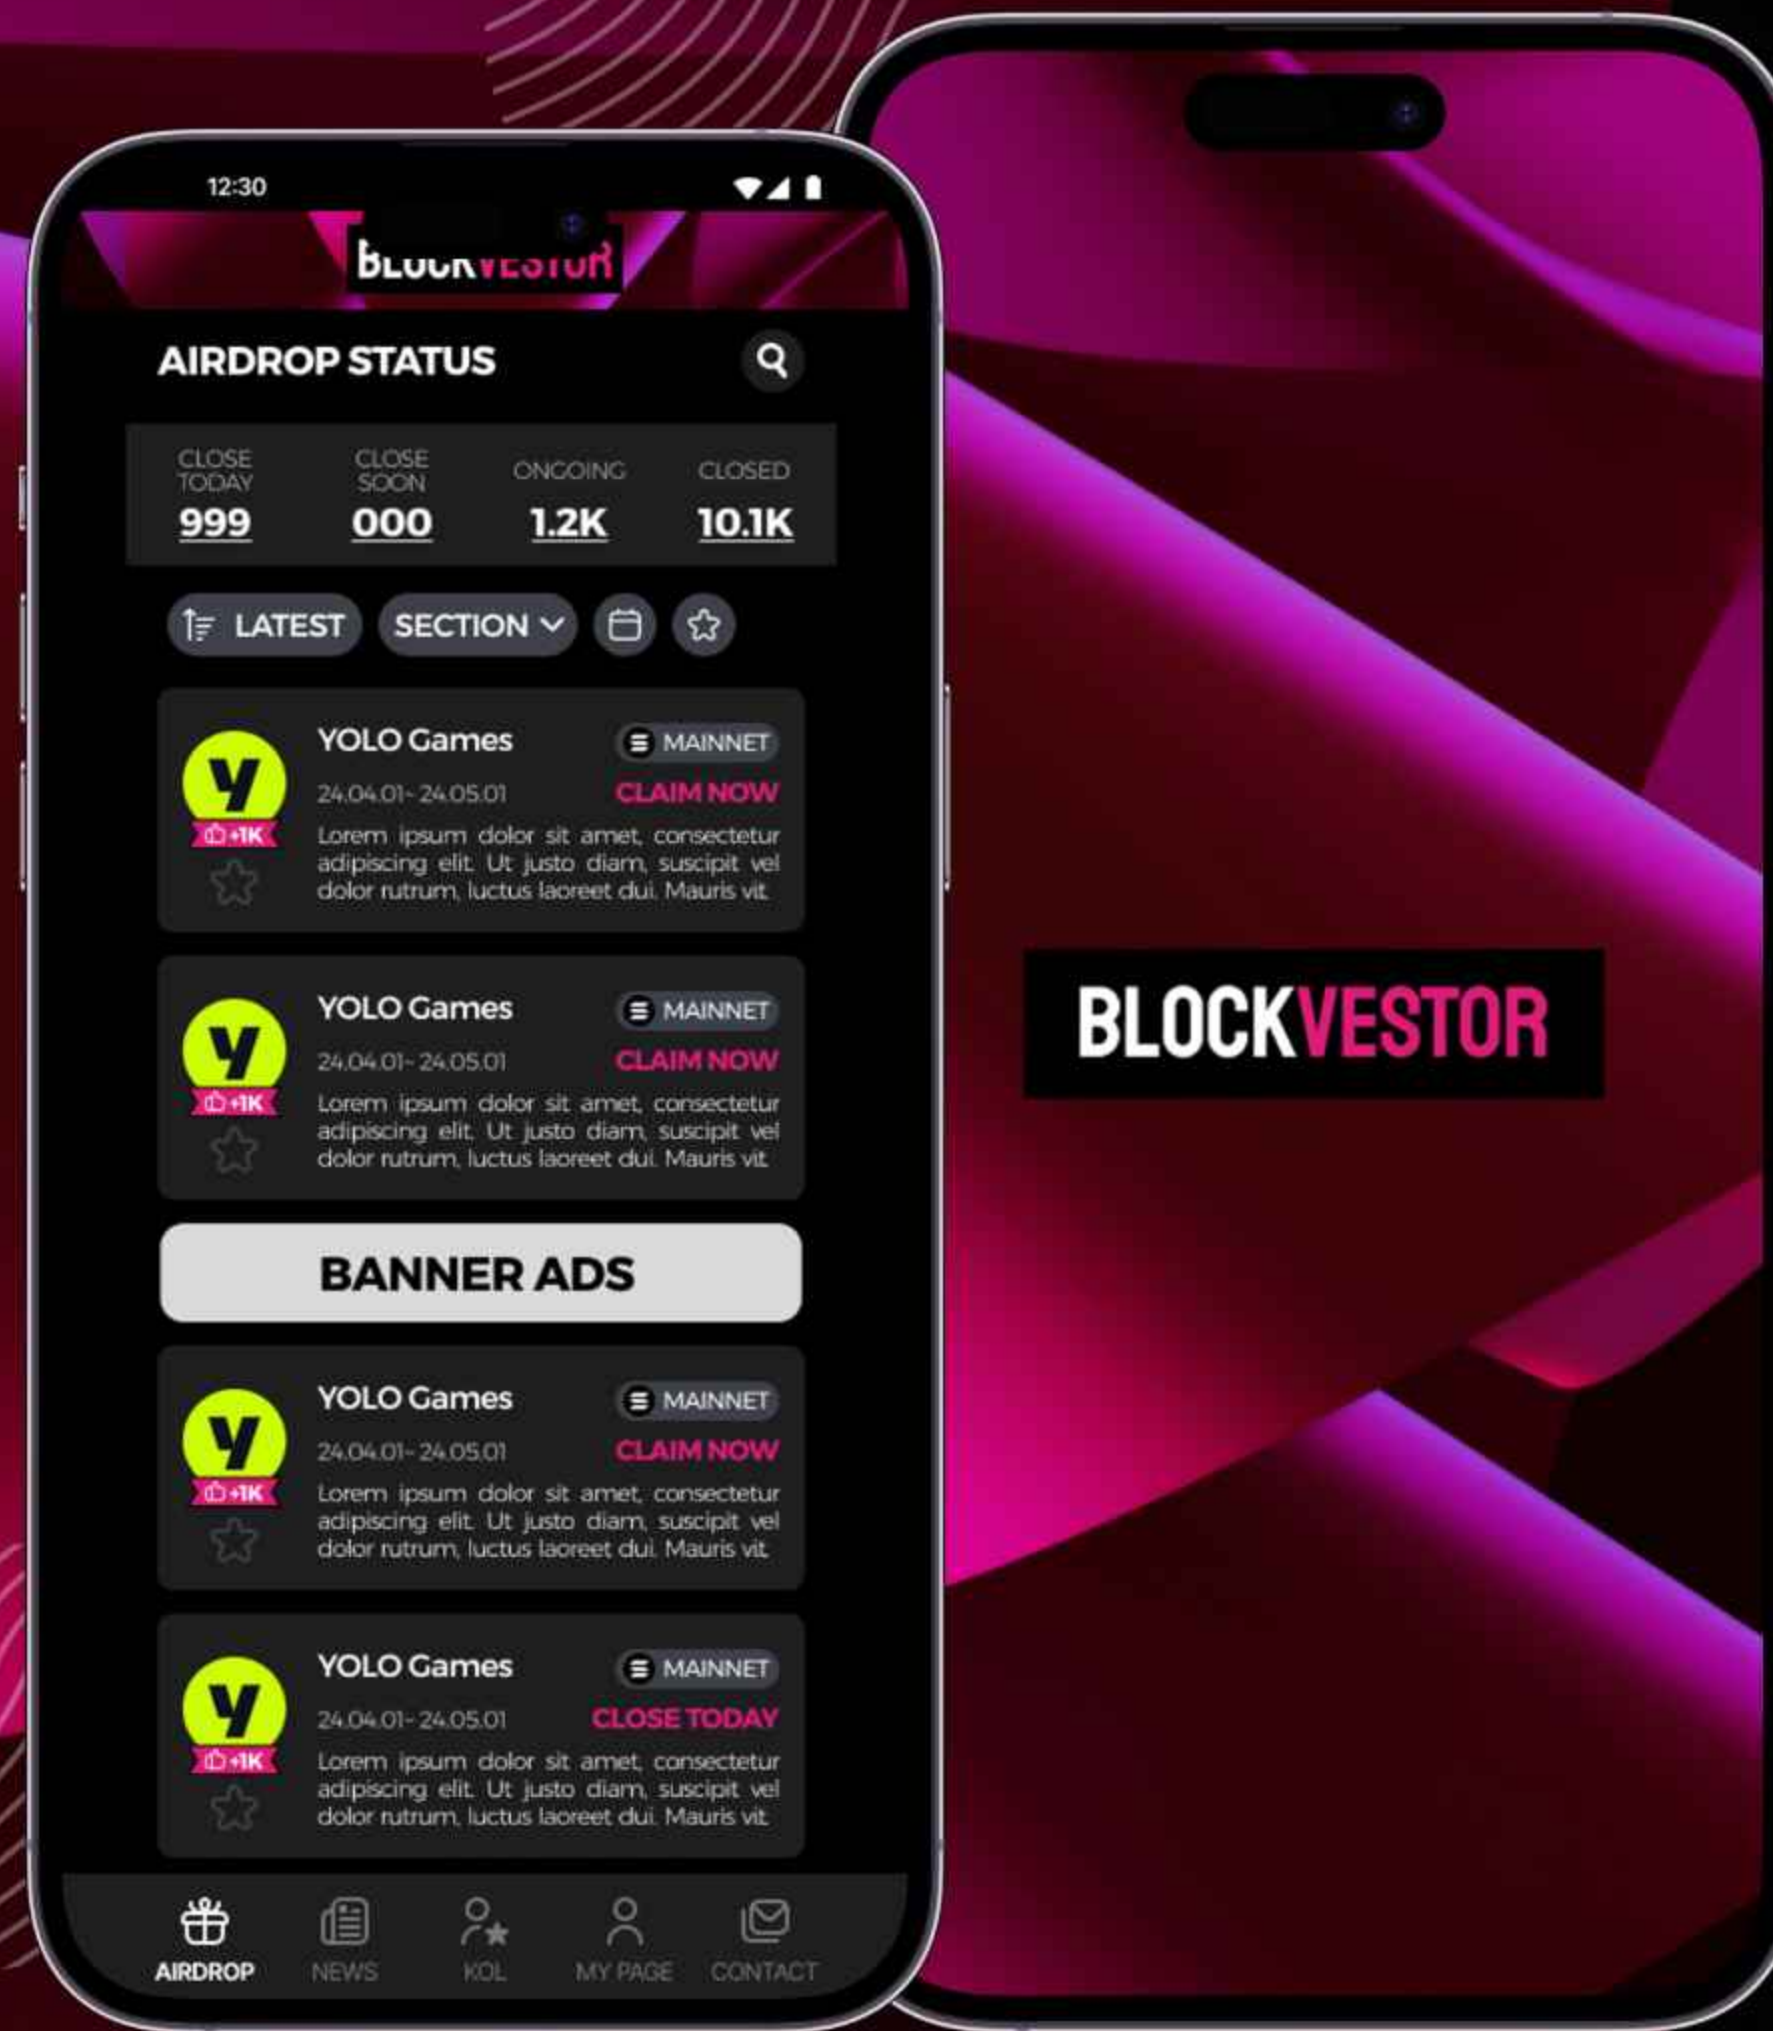

Created a user-friendly event management platform for easy event creation, discovery, and RSVP management, categorized by interests and location. Introduced a point-earning system where users earn points by checking into geofenced locations, with real-time alerts for new opportunities. Added an interactive map for finding point-earning locations and event updates. Ensured strong privacy and security measures for user data, provided admin-only event communication, and integrated social features for following and notifications. Included user search functionality and detailed profiles to showcase event participation and achievements.

Saldo: Social Media

The ultimate platform for micro-influencers to monetize their online presence and make a difference. Effortlessly share relevant deals, earn royalties on your actions, and manage campaigns with our user-friendly mobile app. Designed for simplicity, no technical know-how is needed. Access tailored deals to maximize engagement and turn your influence into income. Start making a big impact with Saldo today!

BLOCKVESTOR

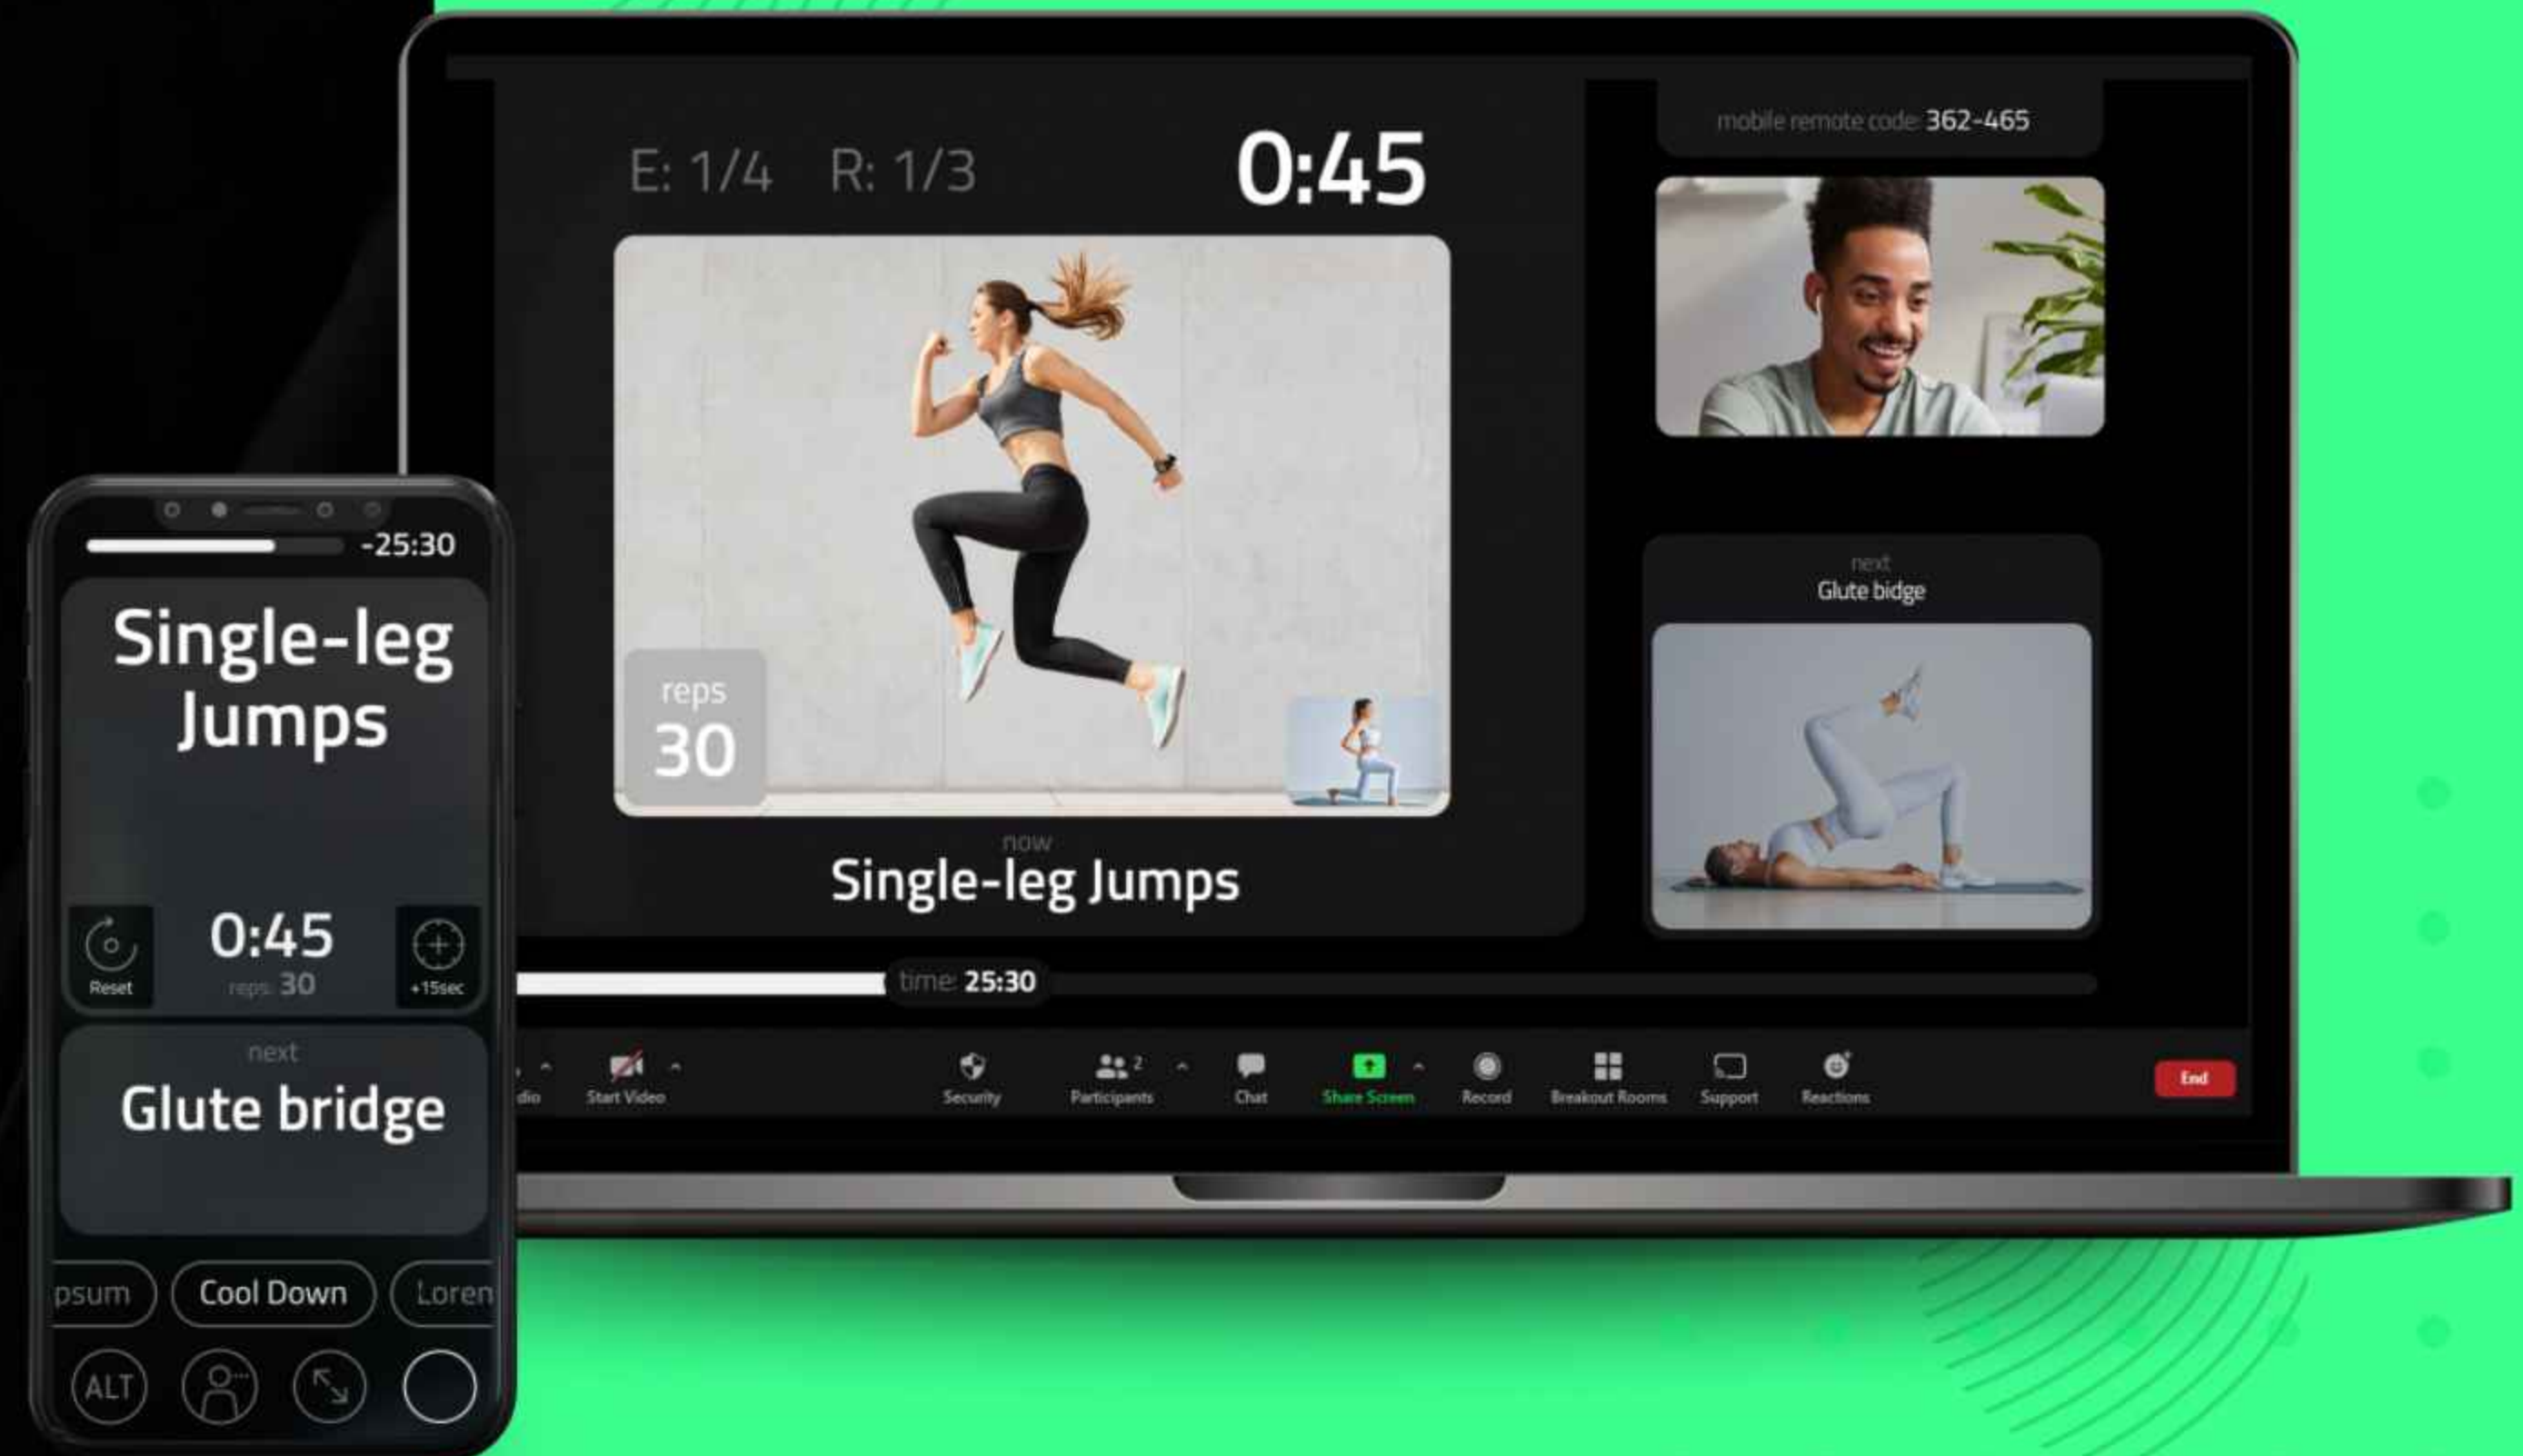

Blockvestor: Influencer Platform

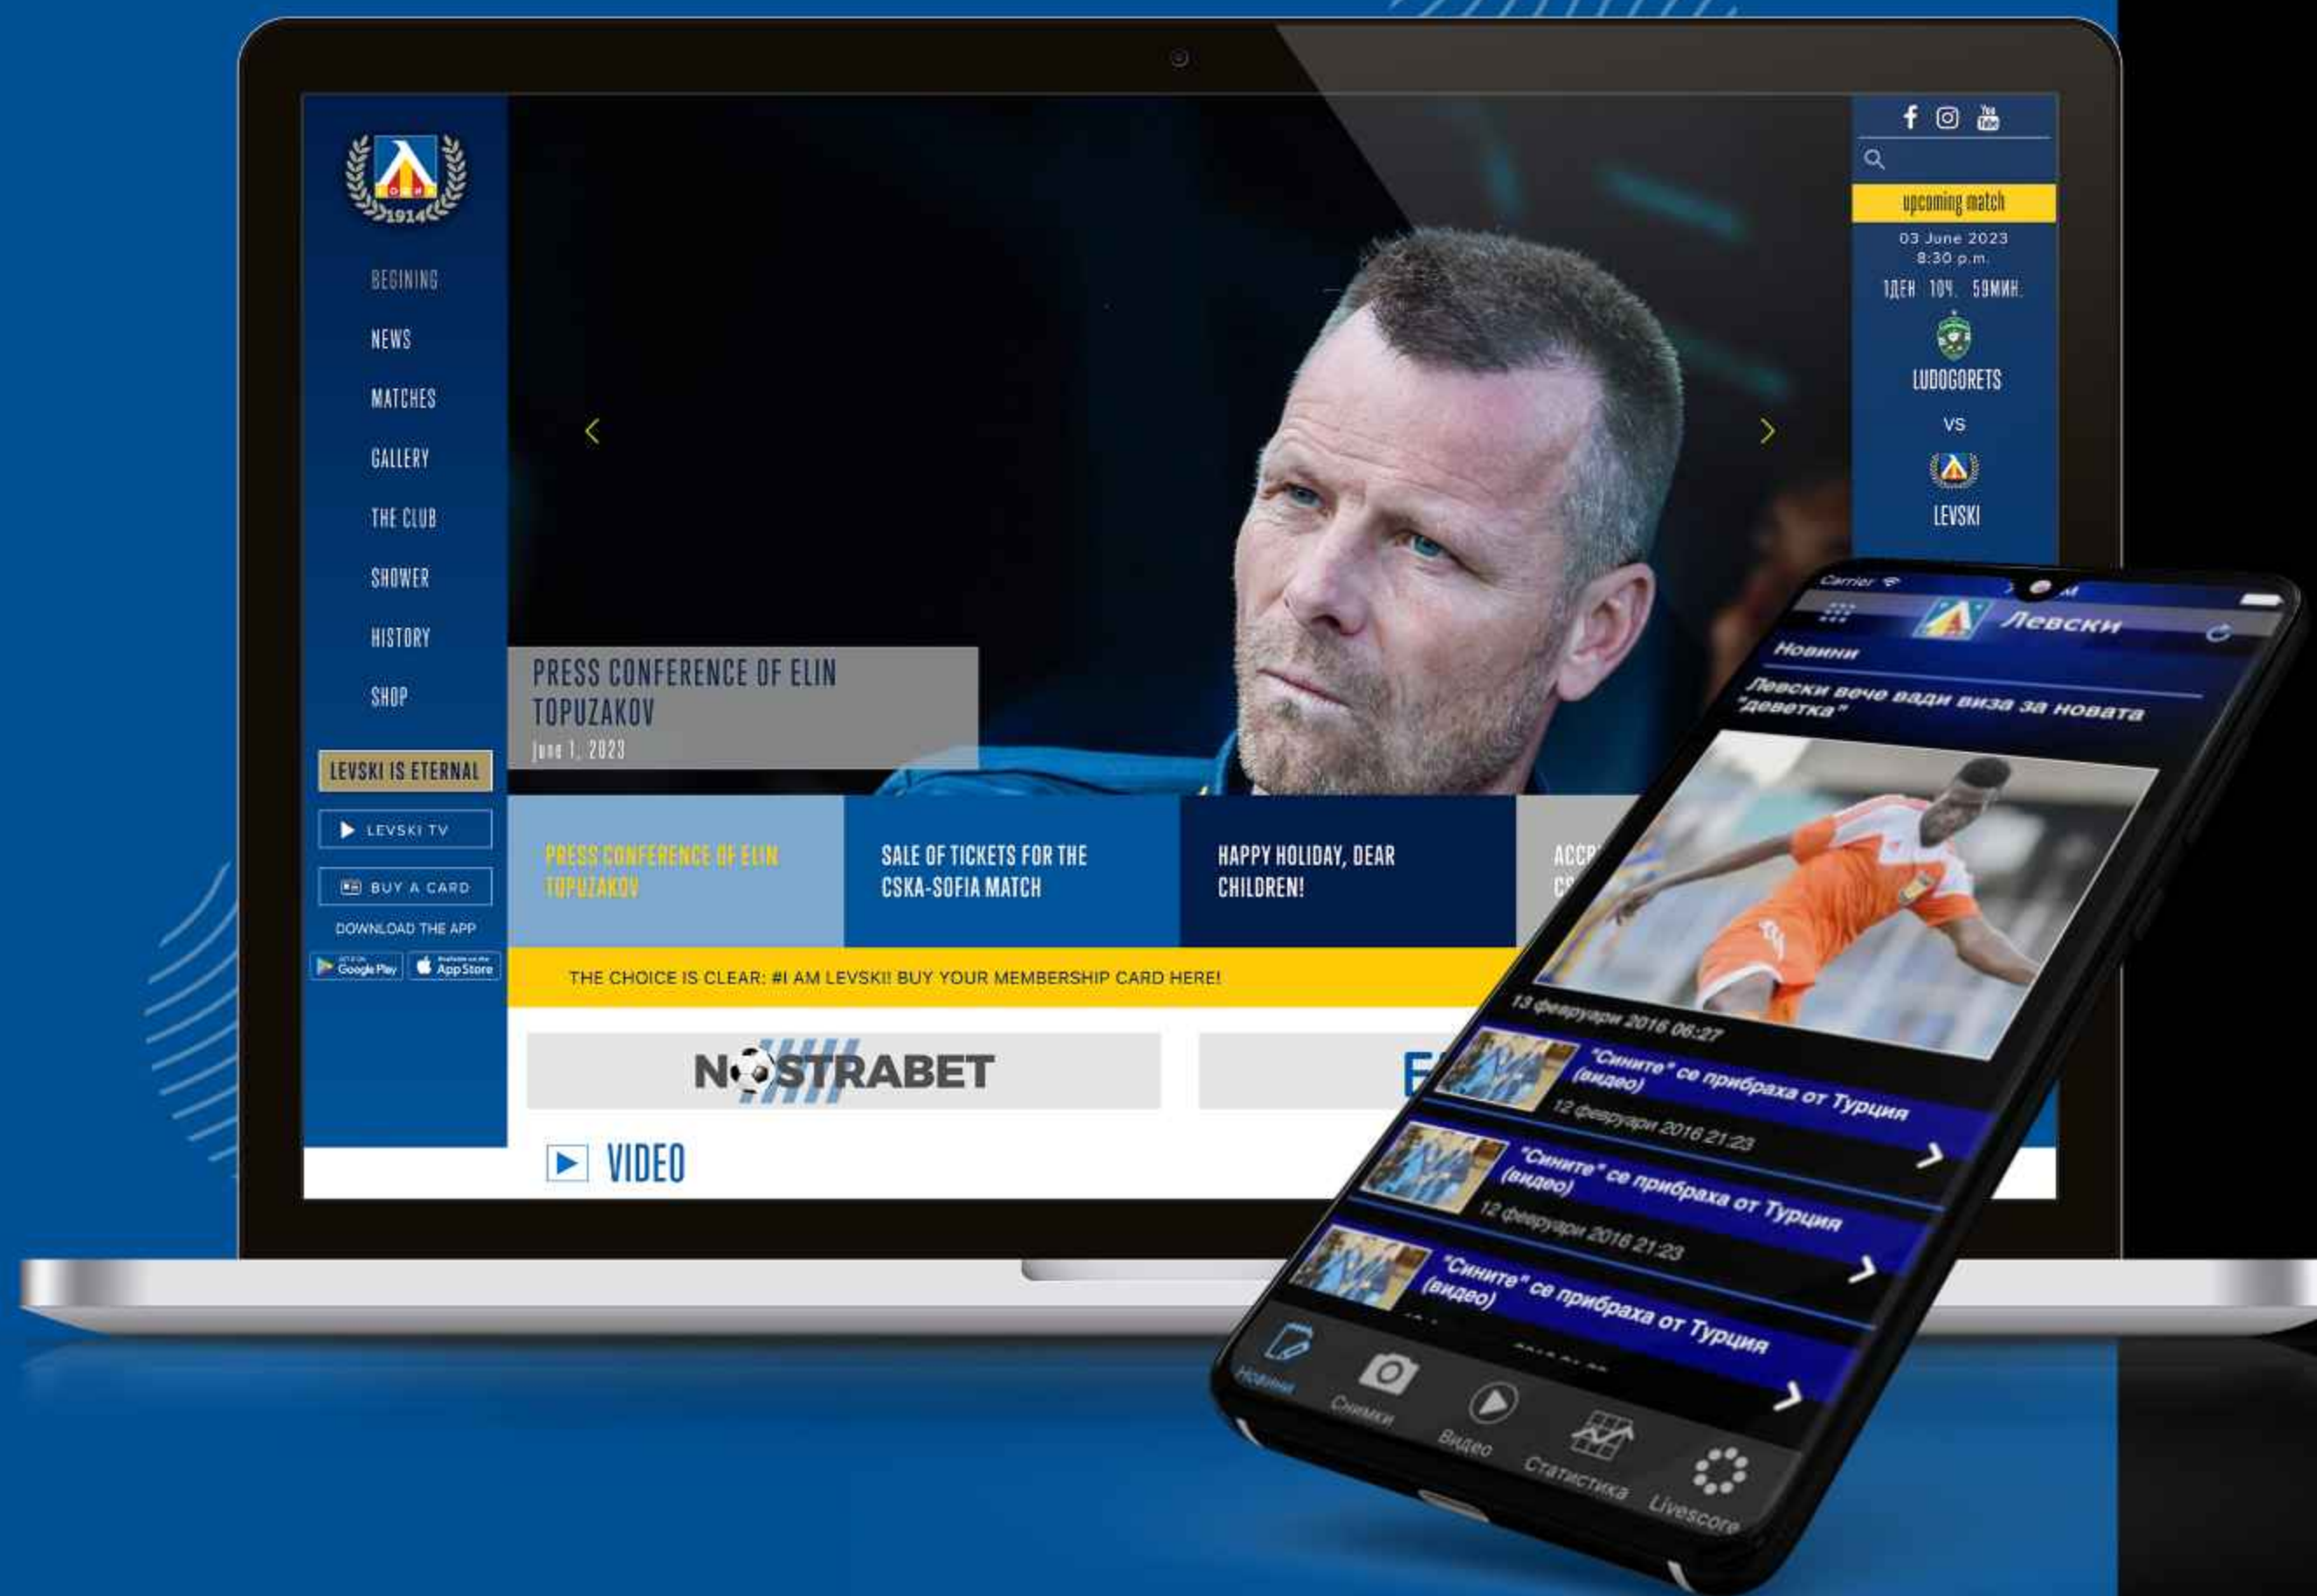

BlockVestor is an innovative platform connecting marketers with influencers for their projects. It simplifies the process of hiring influencers, enabling marketers to find the perfect match for their campaigns. The platform ensures streamlined collaboration and maximizes the impact of marketing efforts through effective influencer partnerships.

Trenergo: Health & Fitness

Effortlessly create professional virtual classes and on-demand workouts with our health and fitness app, designed to minimise post production time. Our user-friendly platform allows you to quickly produce high-quality content, enabling you to focus more on delivering engaging fitness experiences and less on editing and technical adjustments.

Levski

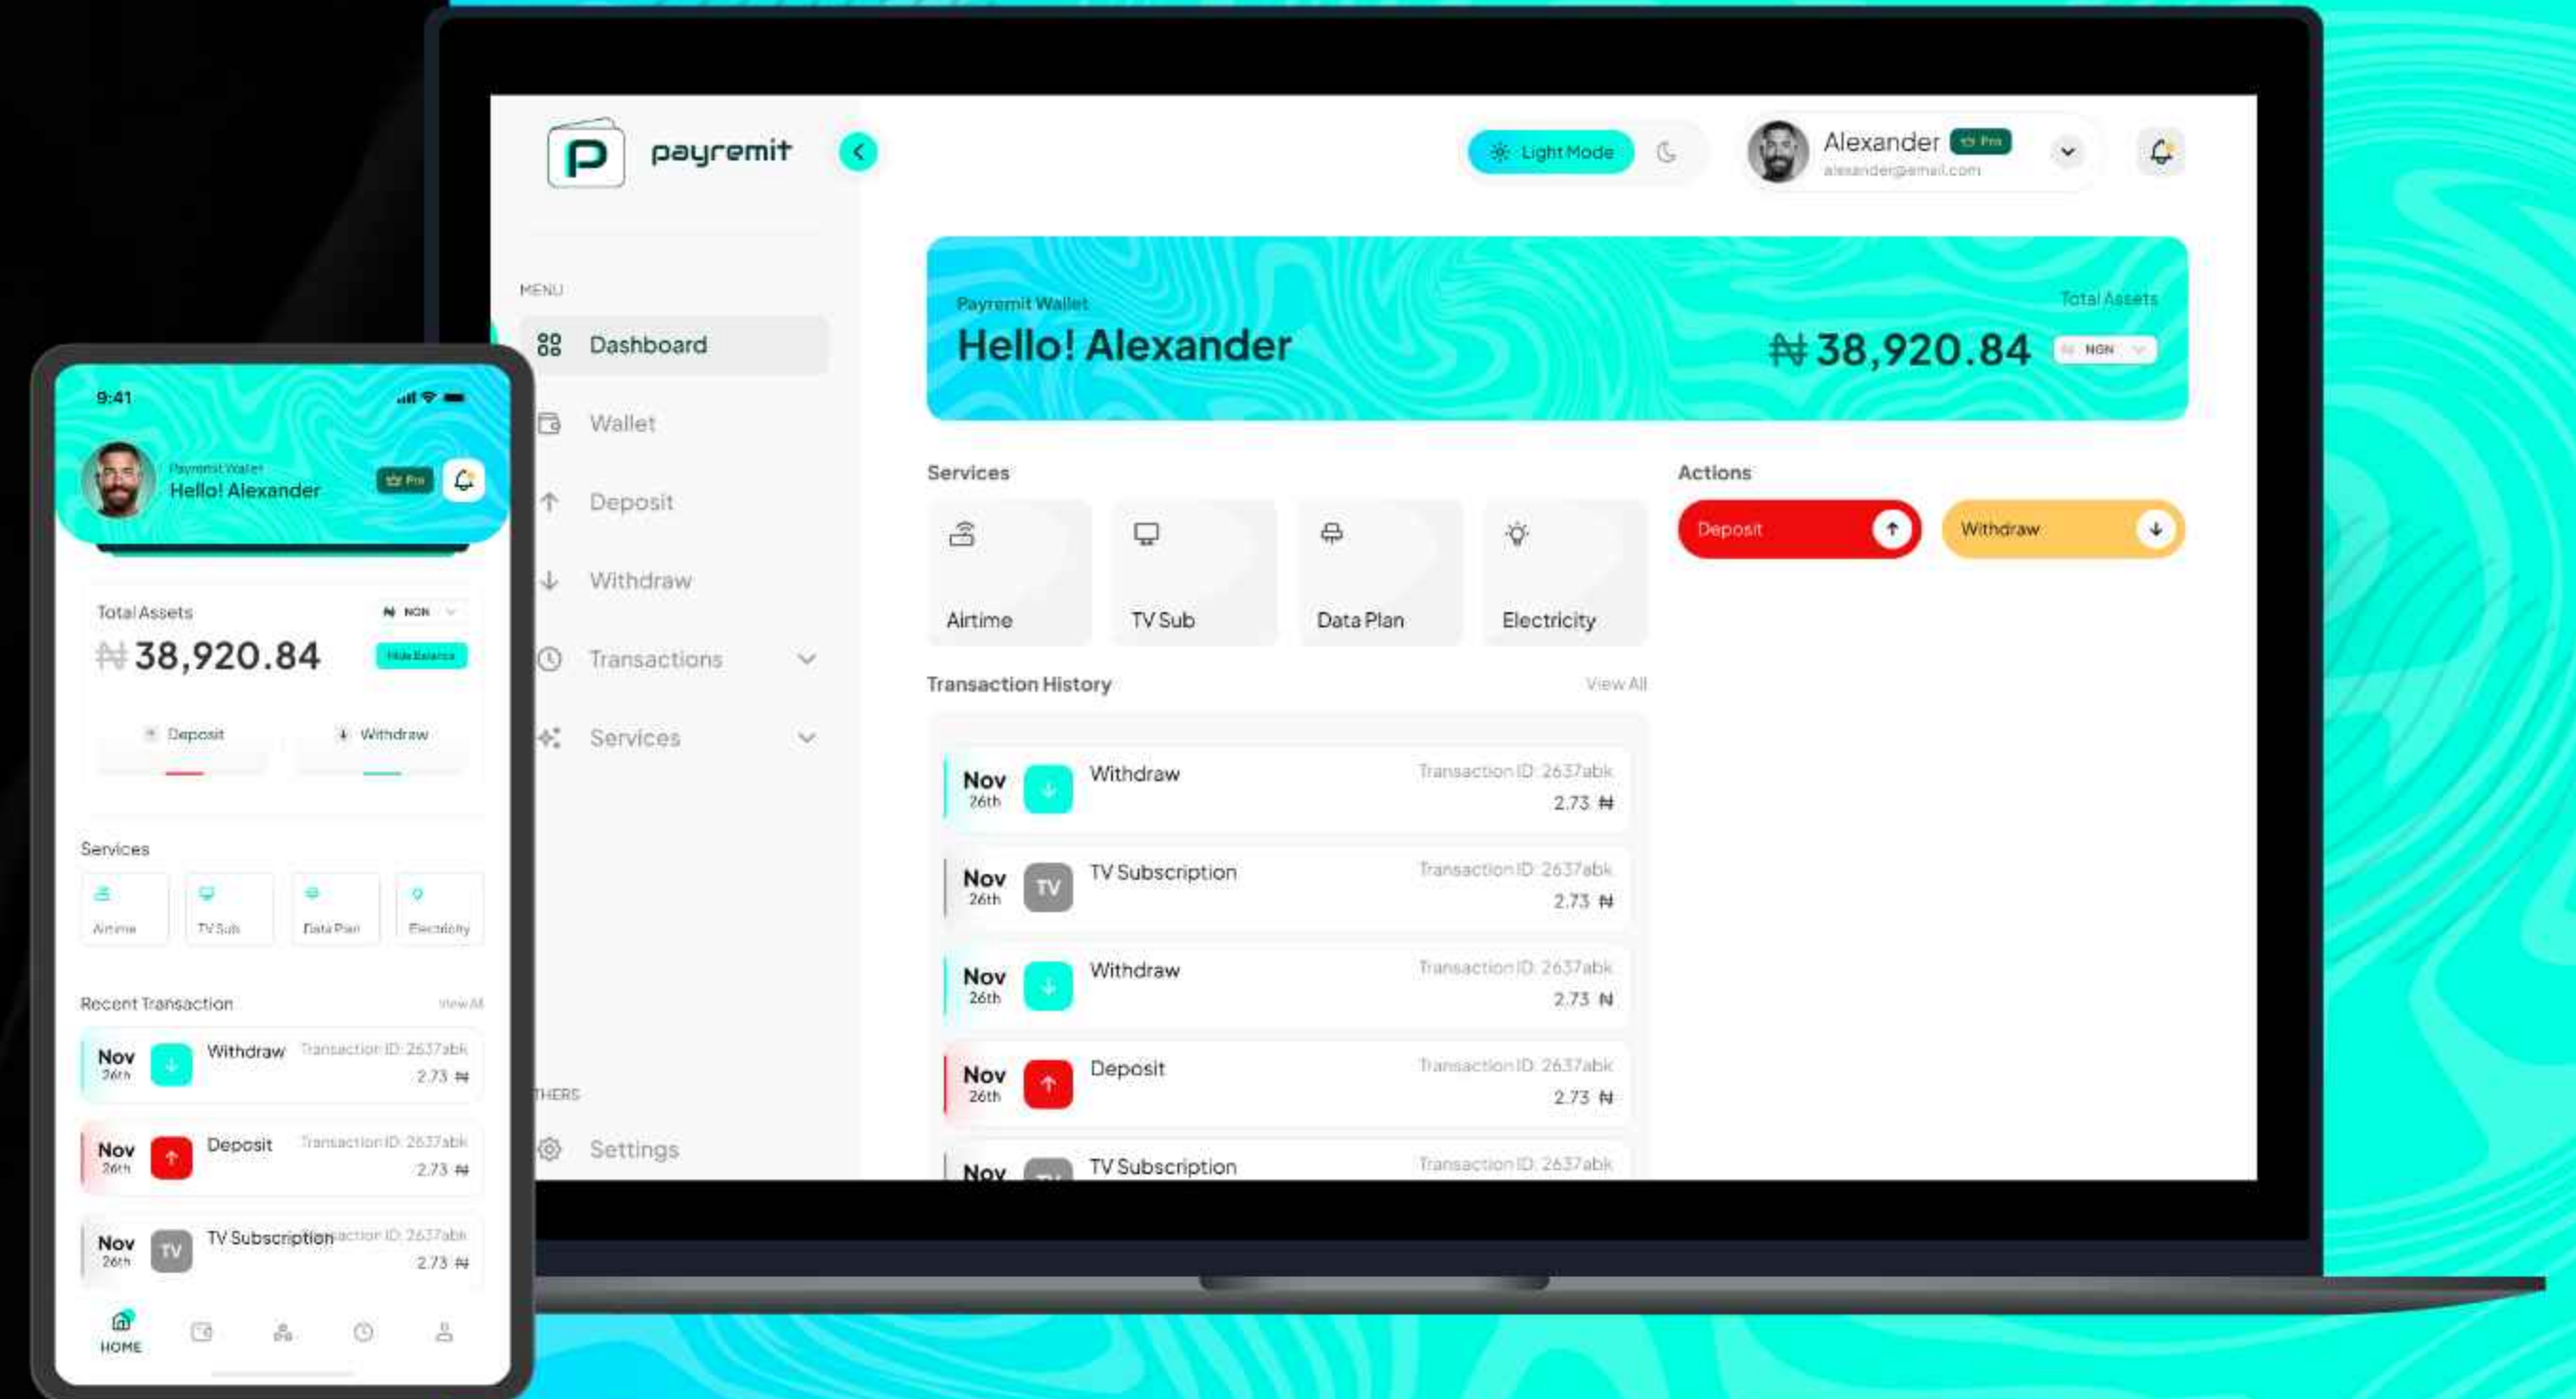

PFC Levski Sofia: Sports

Levski is the official app of Levski Sofia, one of Bulgaria's premier football clubs, designed to elevate the fan experience with the latest news, match schedules, and player profiles. It offers a dynamic platform for fan engagement, featuring forums, straightforward ticket purchases, and exclusive merchandise shopping. Dive into the rich history of the club and stay connected with the vibrant Levski community, all through one comprehensive application dedicated to the fans.

Payremit: Fintech

PayRemit is a versatile utility web and mobile app that allows users to conveniently pay their mobile, electricity, TV, and cable bills. It streamlines the payment process, offering a user-friendly interface for quick and secure transactions. With PayRemit, managing household bills has never been easier.

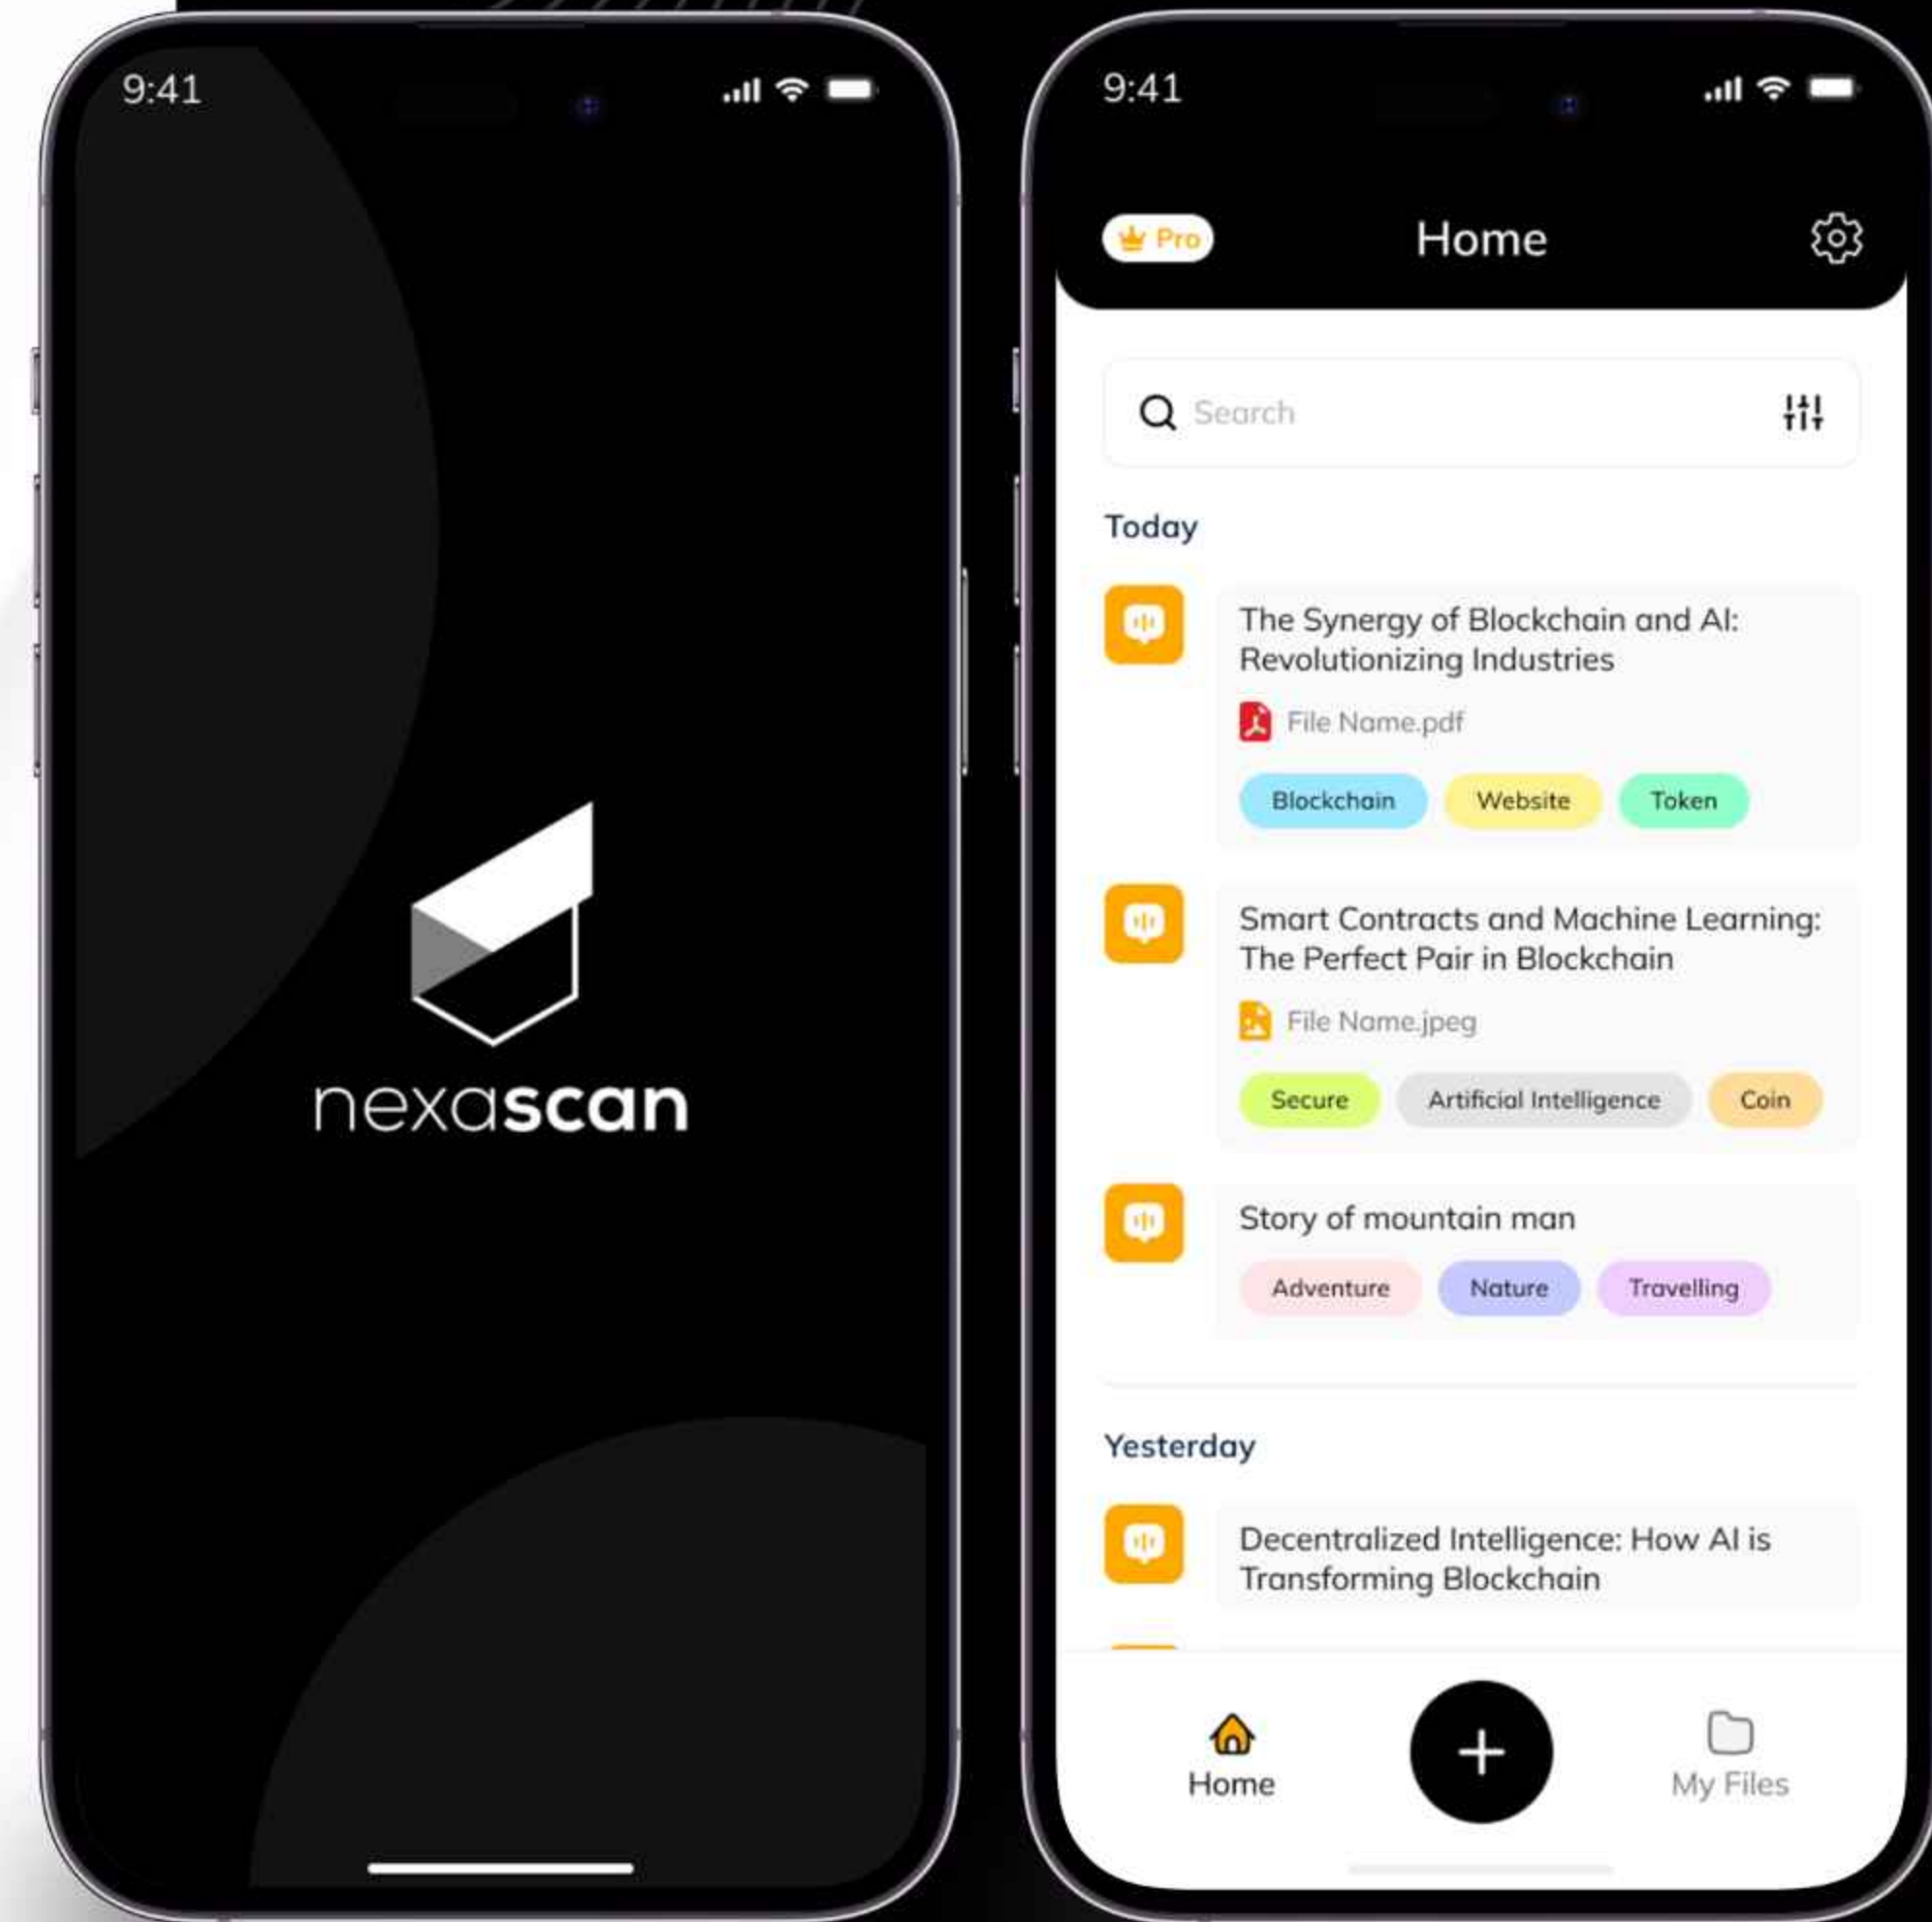

Anime AI: AI

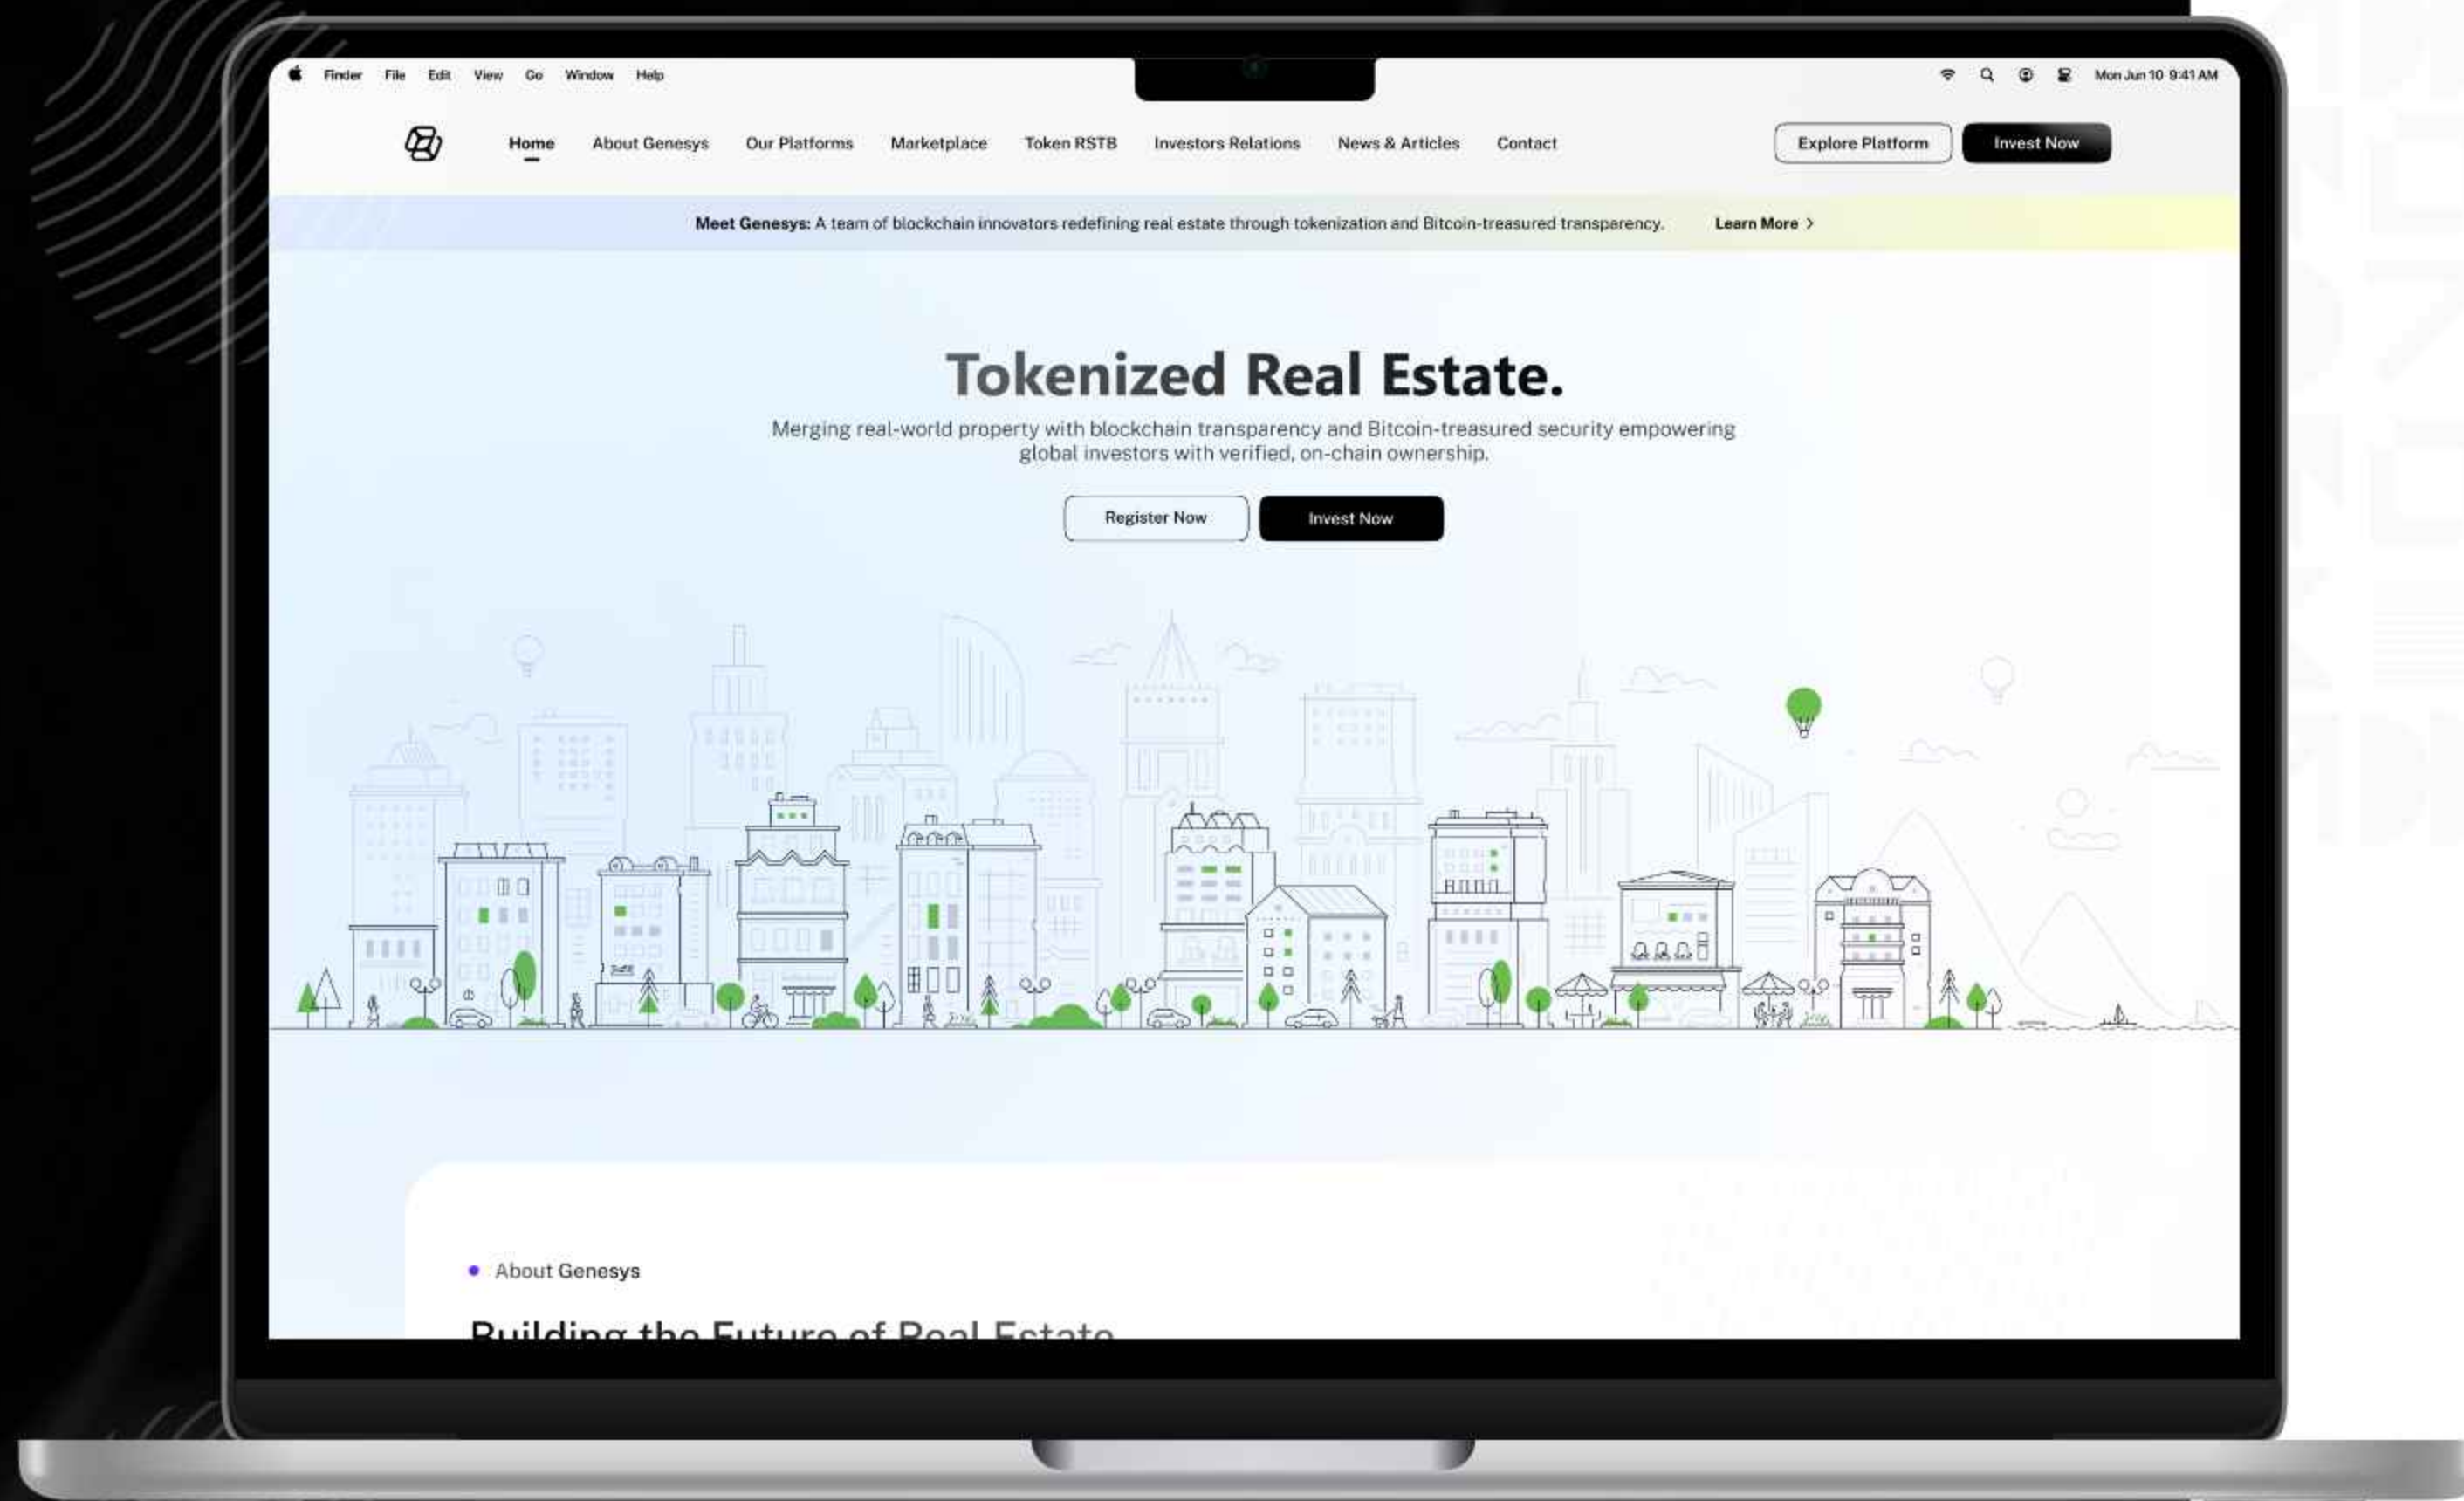

Anime AI is a mobile app that uses advanced AI technology to convert your photos into stunning anime-style videos. Users can capture new images or upload existing ones, apply a variety of anime effects, and create high-quality videos. The app features a user-friendly interface and allows easy sharing and saving of high-resolution anime creations, making it perfect for anime enthusiasts, content creators, and anyone looking to add artistic flair to their images.

Nexascanner: AI

NexaScan is a mobile app that uses advanced AI technology to generate concise summaries from uploaded documents and images. It supports multiple file formats, offers instant results, and features a user-friendly interface. Designed to save time and enhance productivity, NexaScan is ideal for students, professionals, and general users seeking quick insights from lengthy content while ensuring secure data handling.

Regen: Tokenized Real Estate.

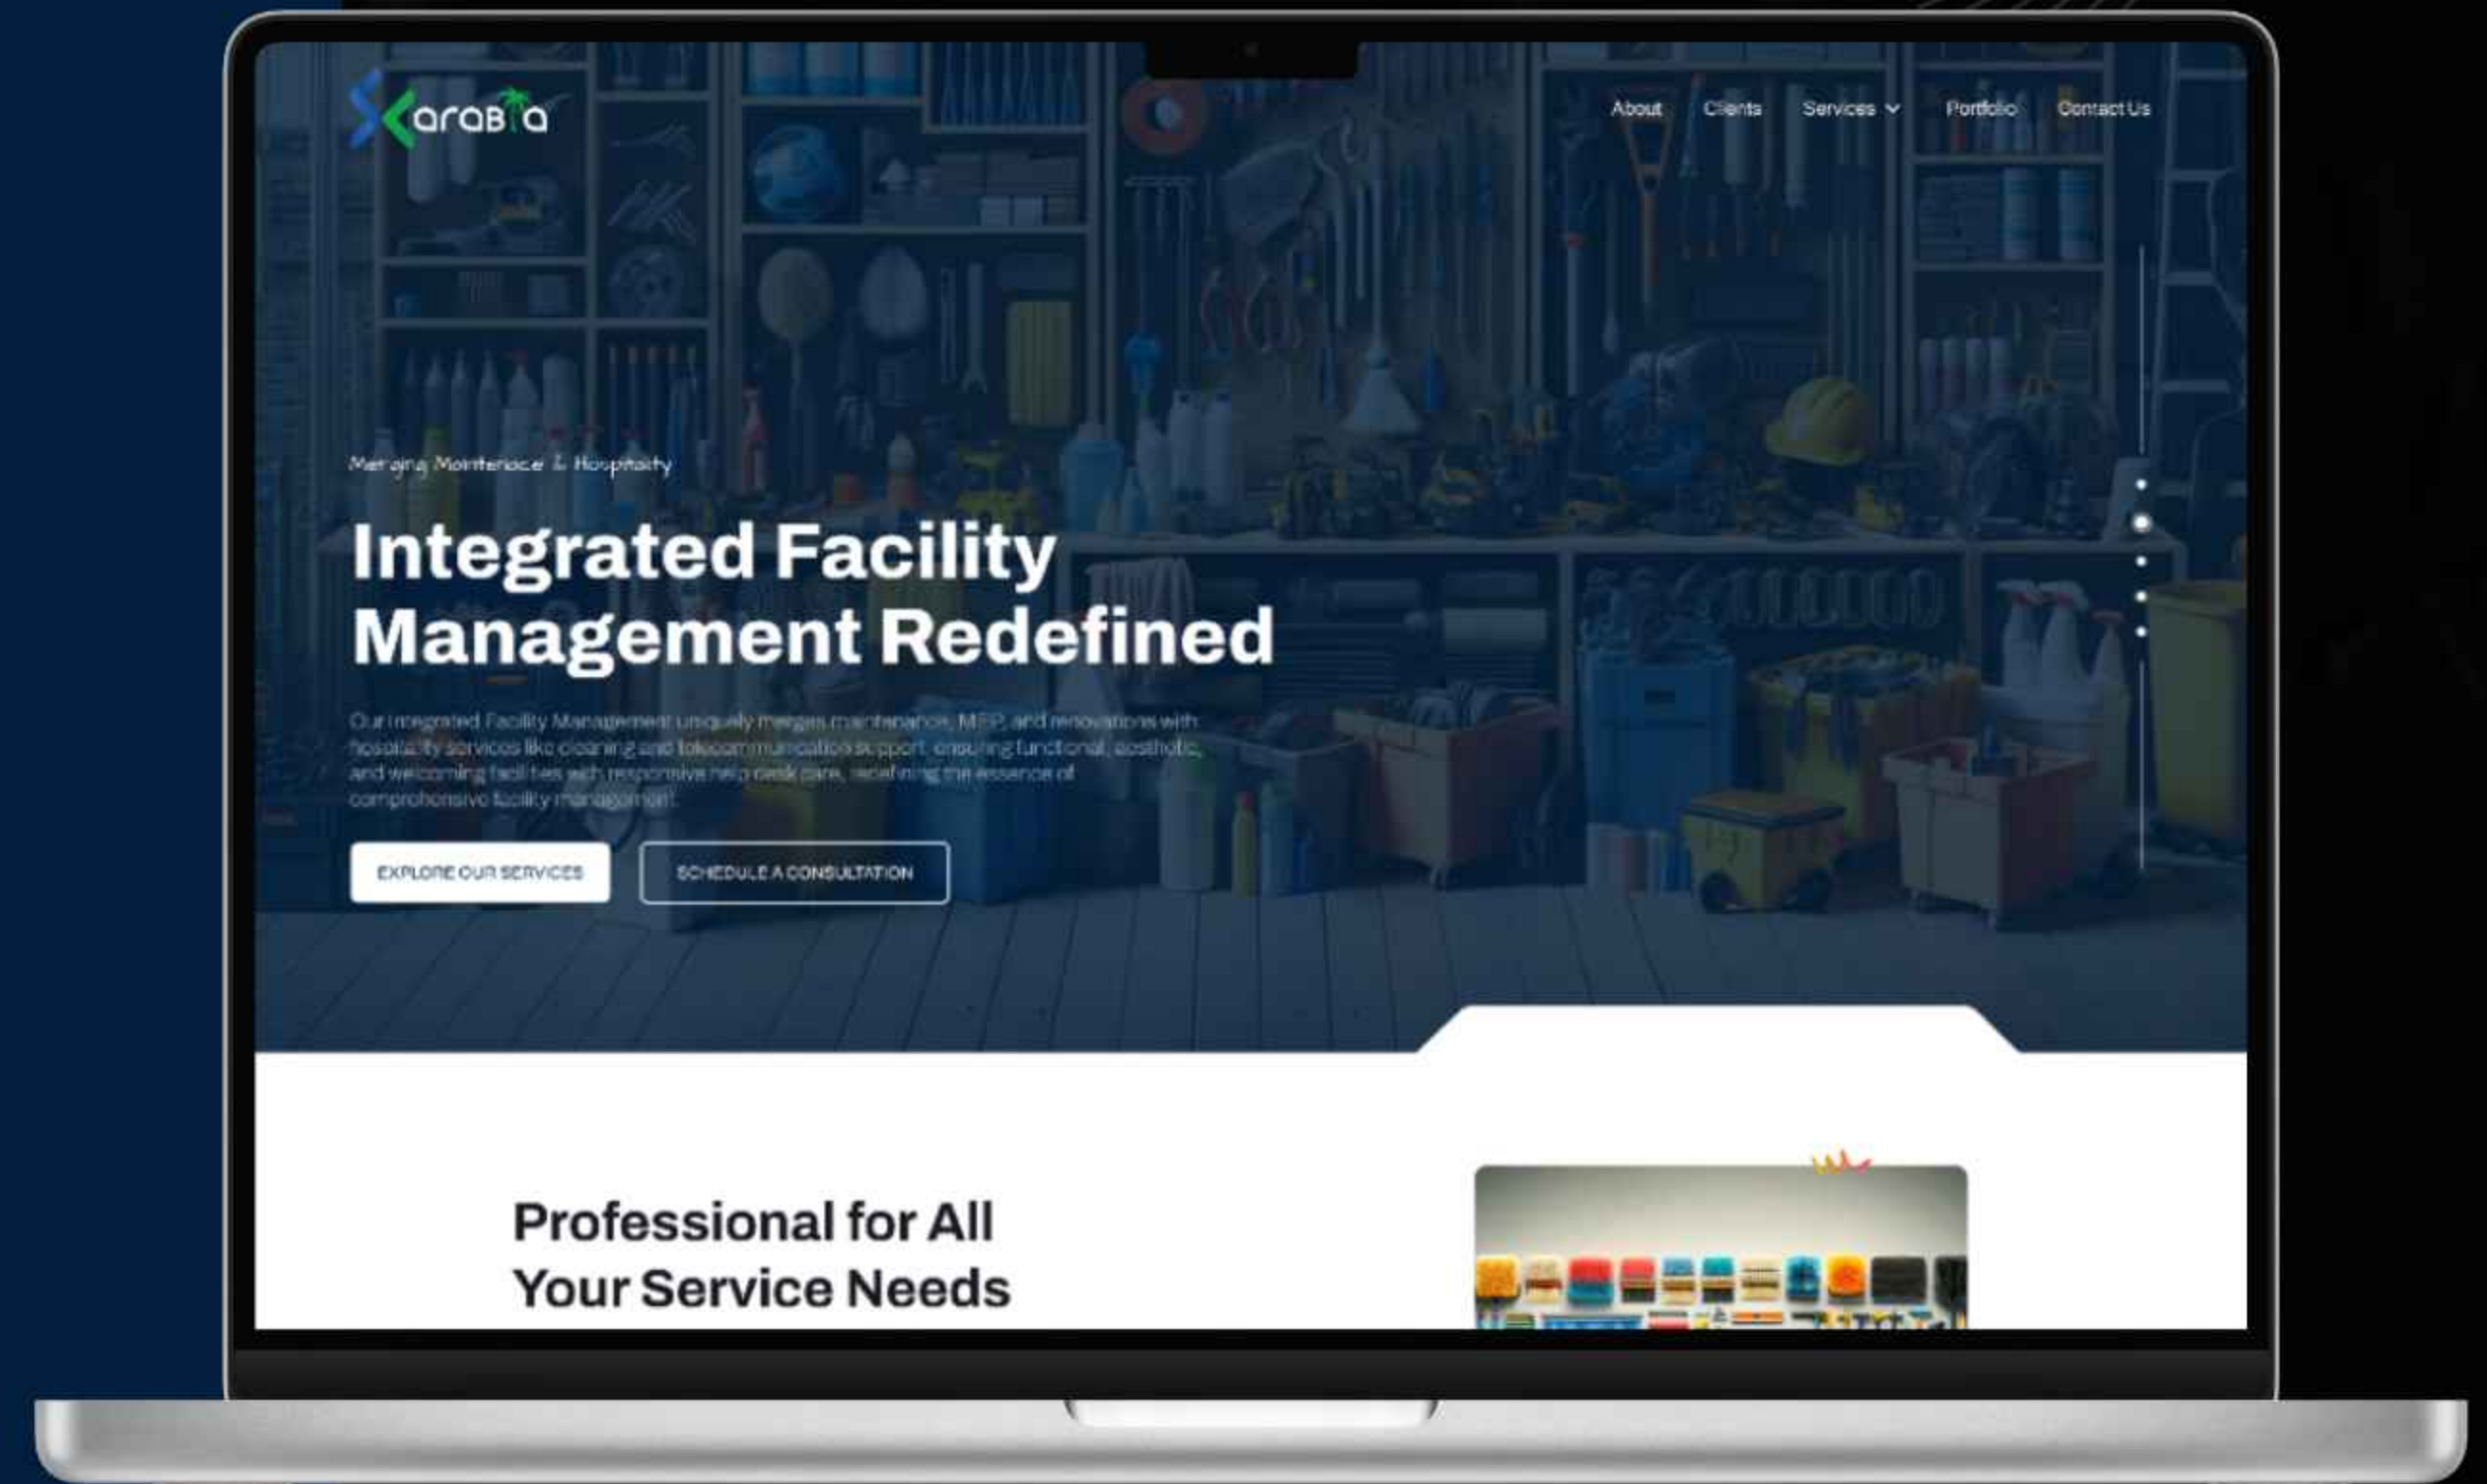

Regen (OTCID: GNIS) is a publicly traded real estate operator delivering tokenized, Bitcoin-backed real estate via Security Token Offerings (STOs). By combining institutional property management with blockchain transparency, Regen enables on-chain asset verification, NFT-based property documentation, and clear visibility into both real estate holdings and its Bitcoin Treasury.

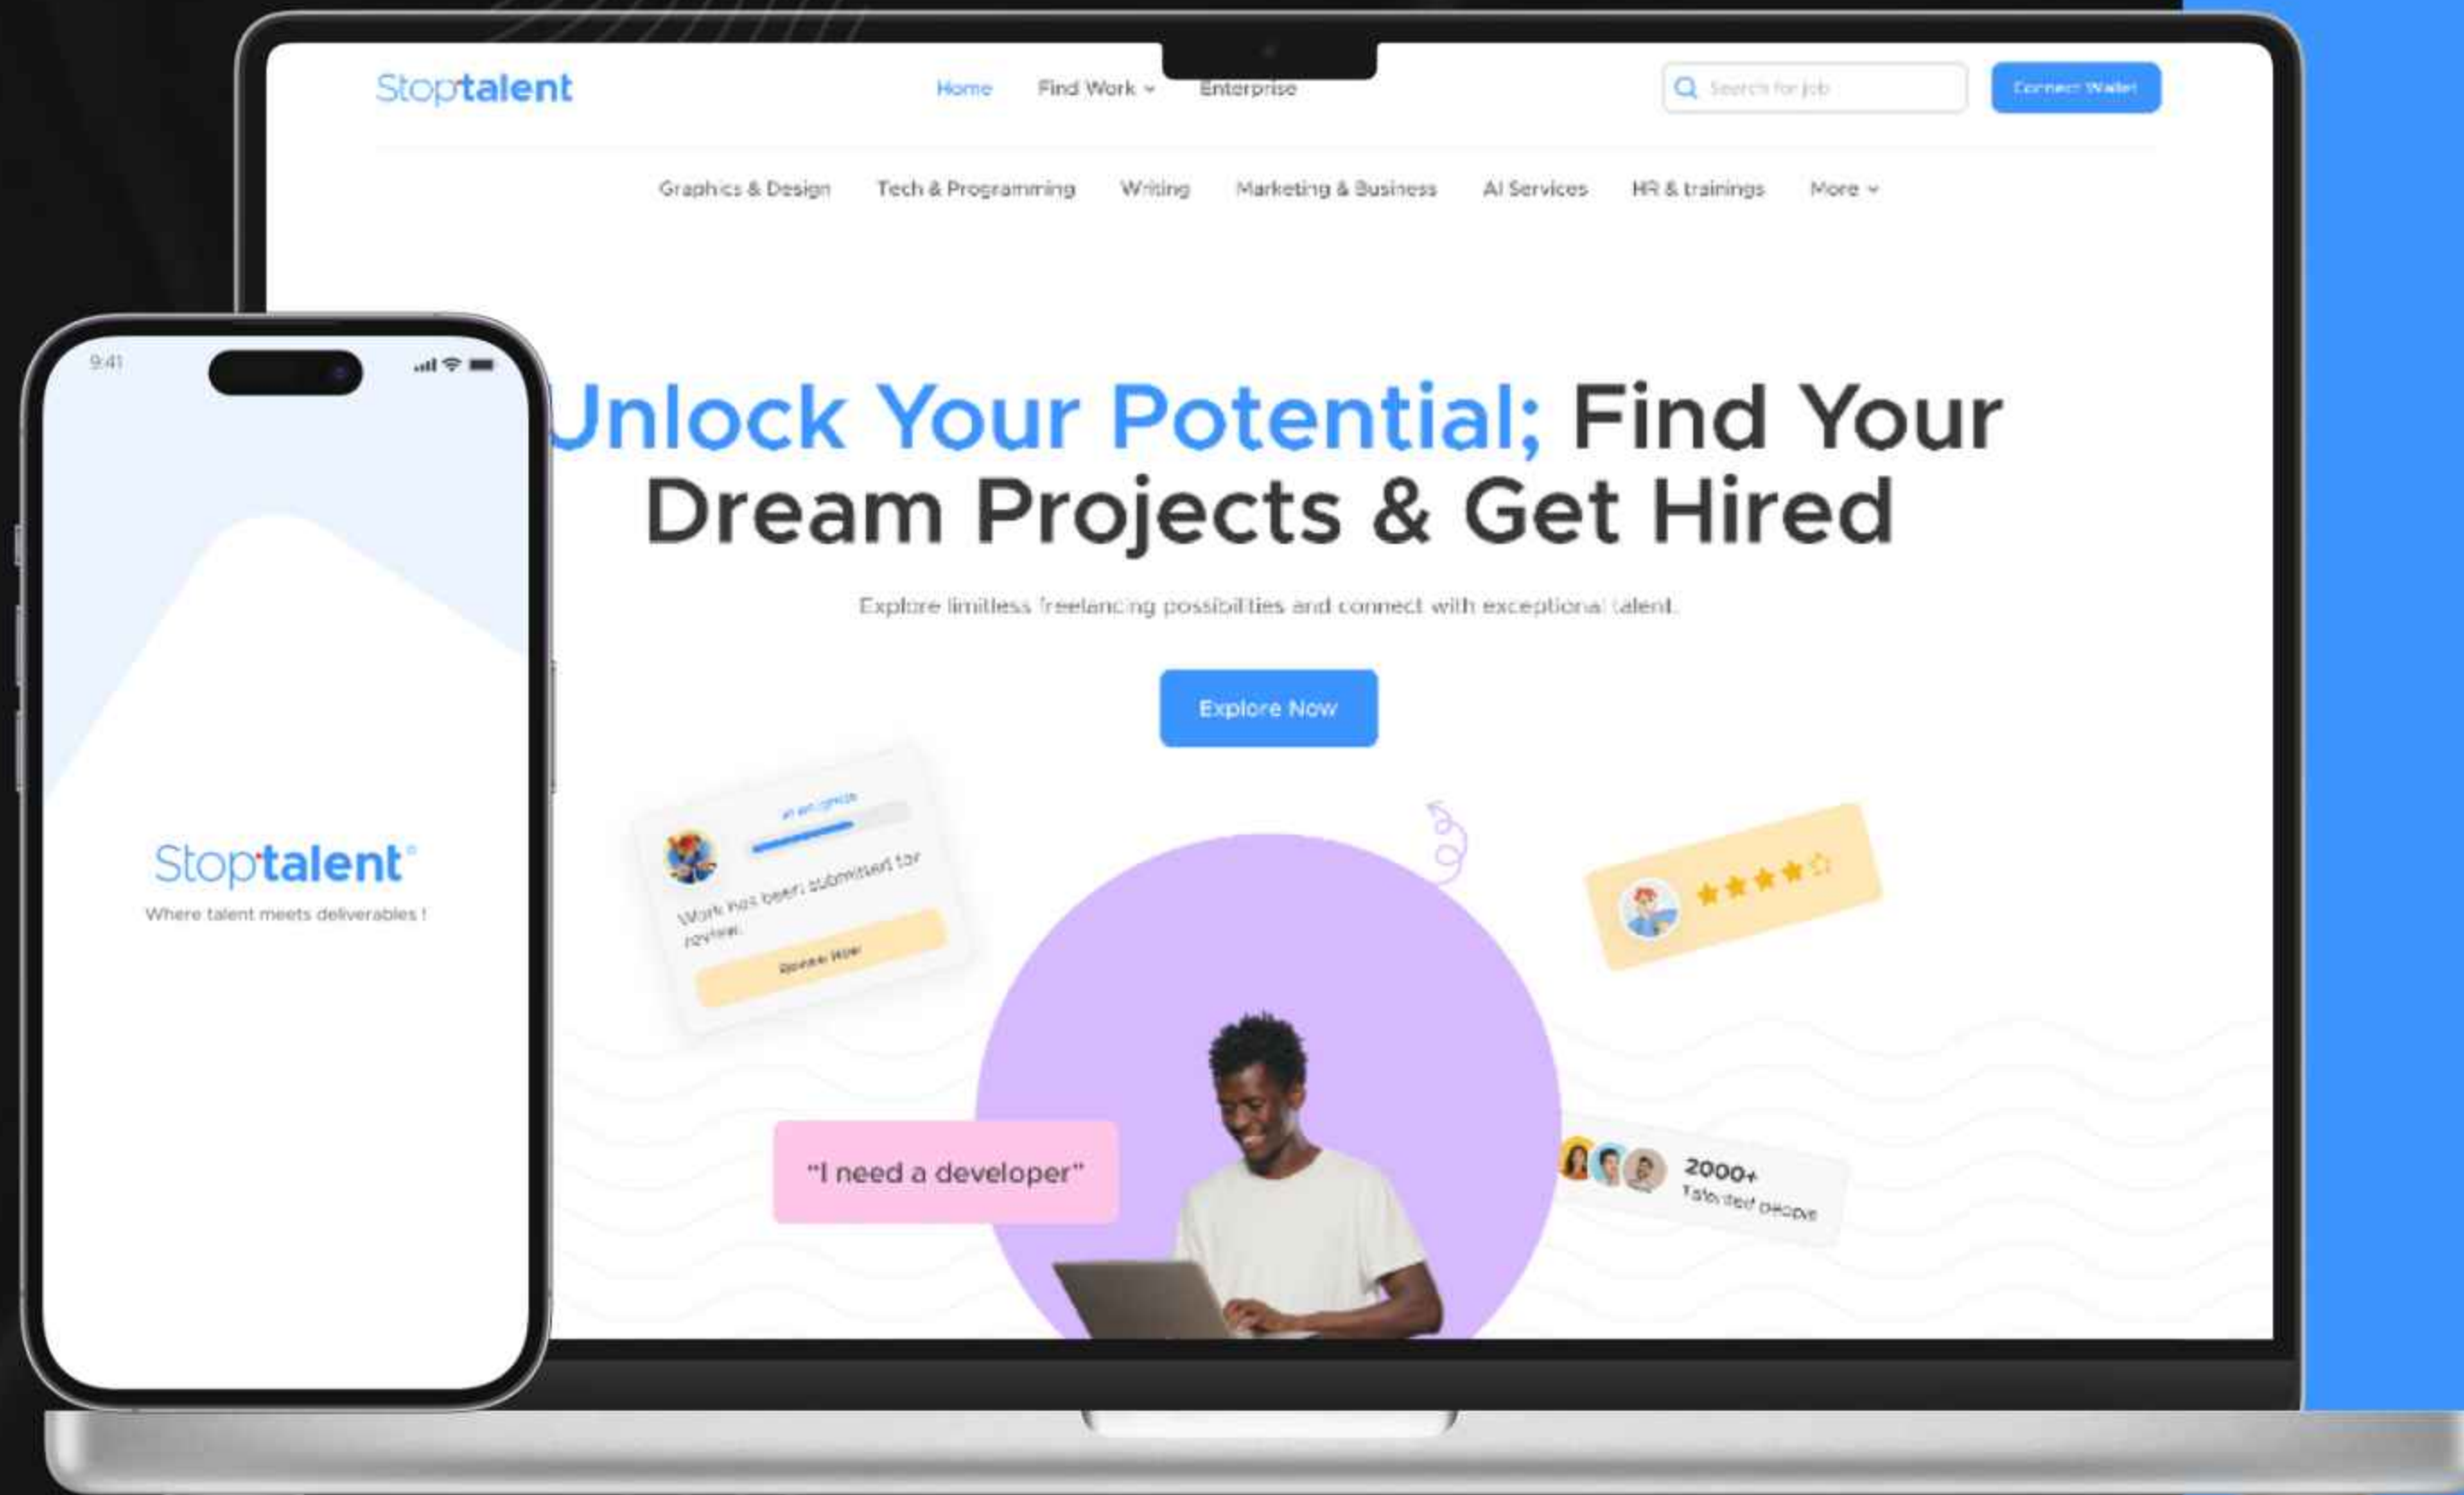

SK-arabia: Integrated Services

Skarabia is a comprehensive service-based platform where users can access a wide range of integrated services. It provides a one-stop solution for various needs, offering convenience and efficiency. With Skarabia, users can seamlessly find and utilize services, ensuring a hassle-free experience.

StopTalent®

Where talent meets deliverables !

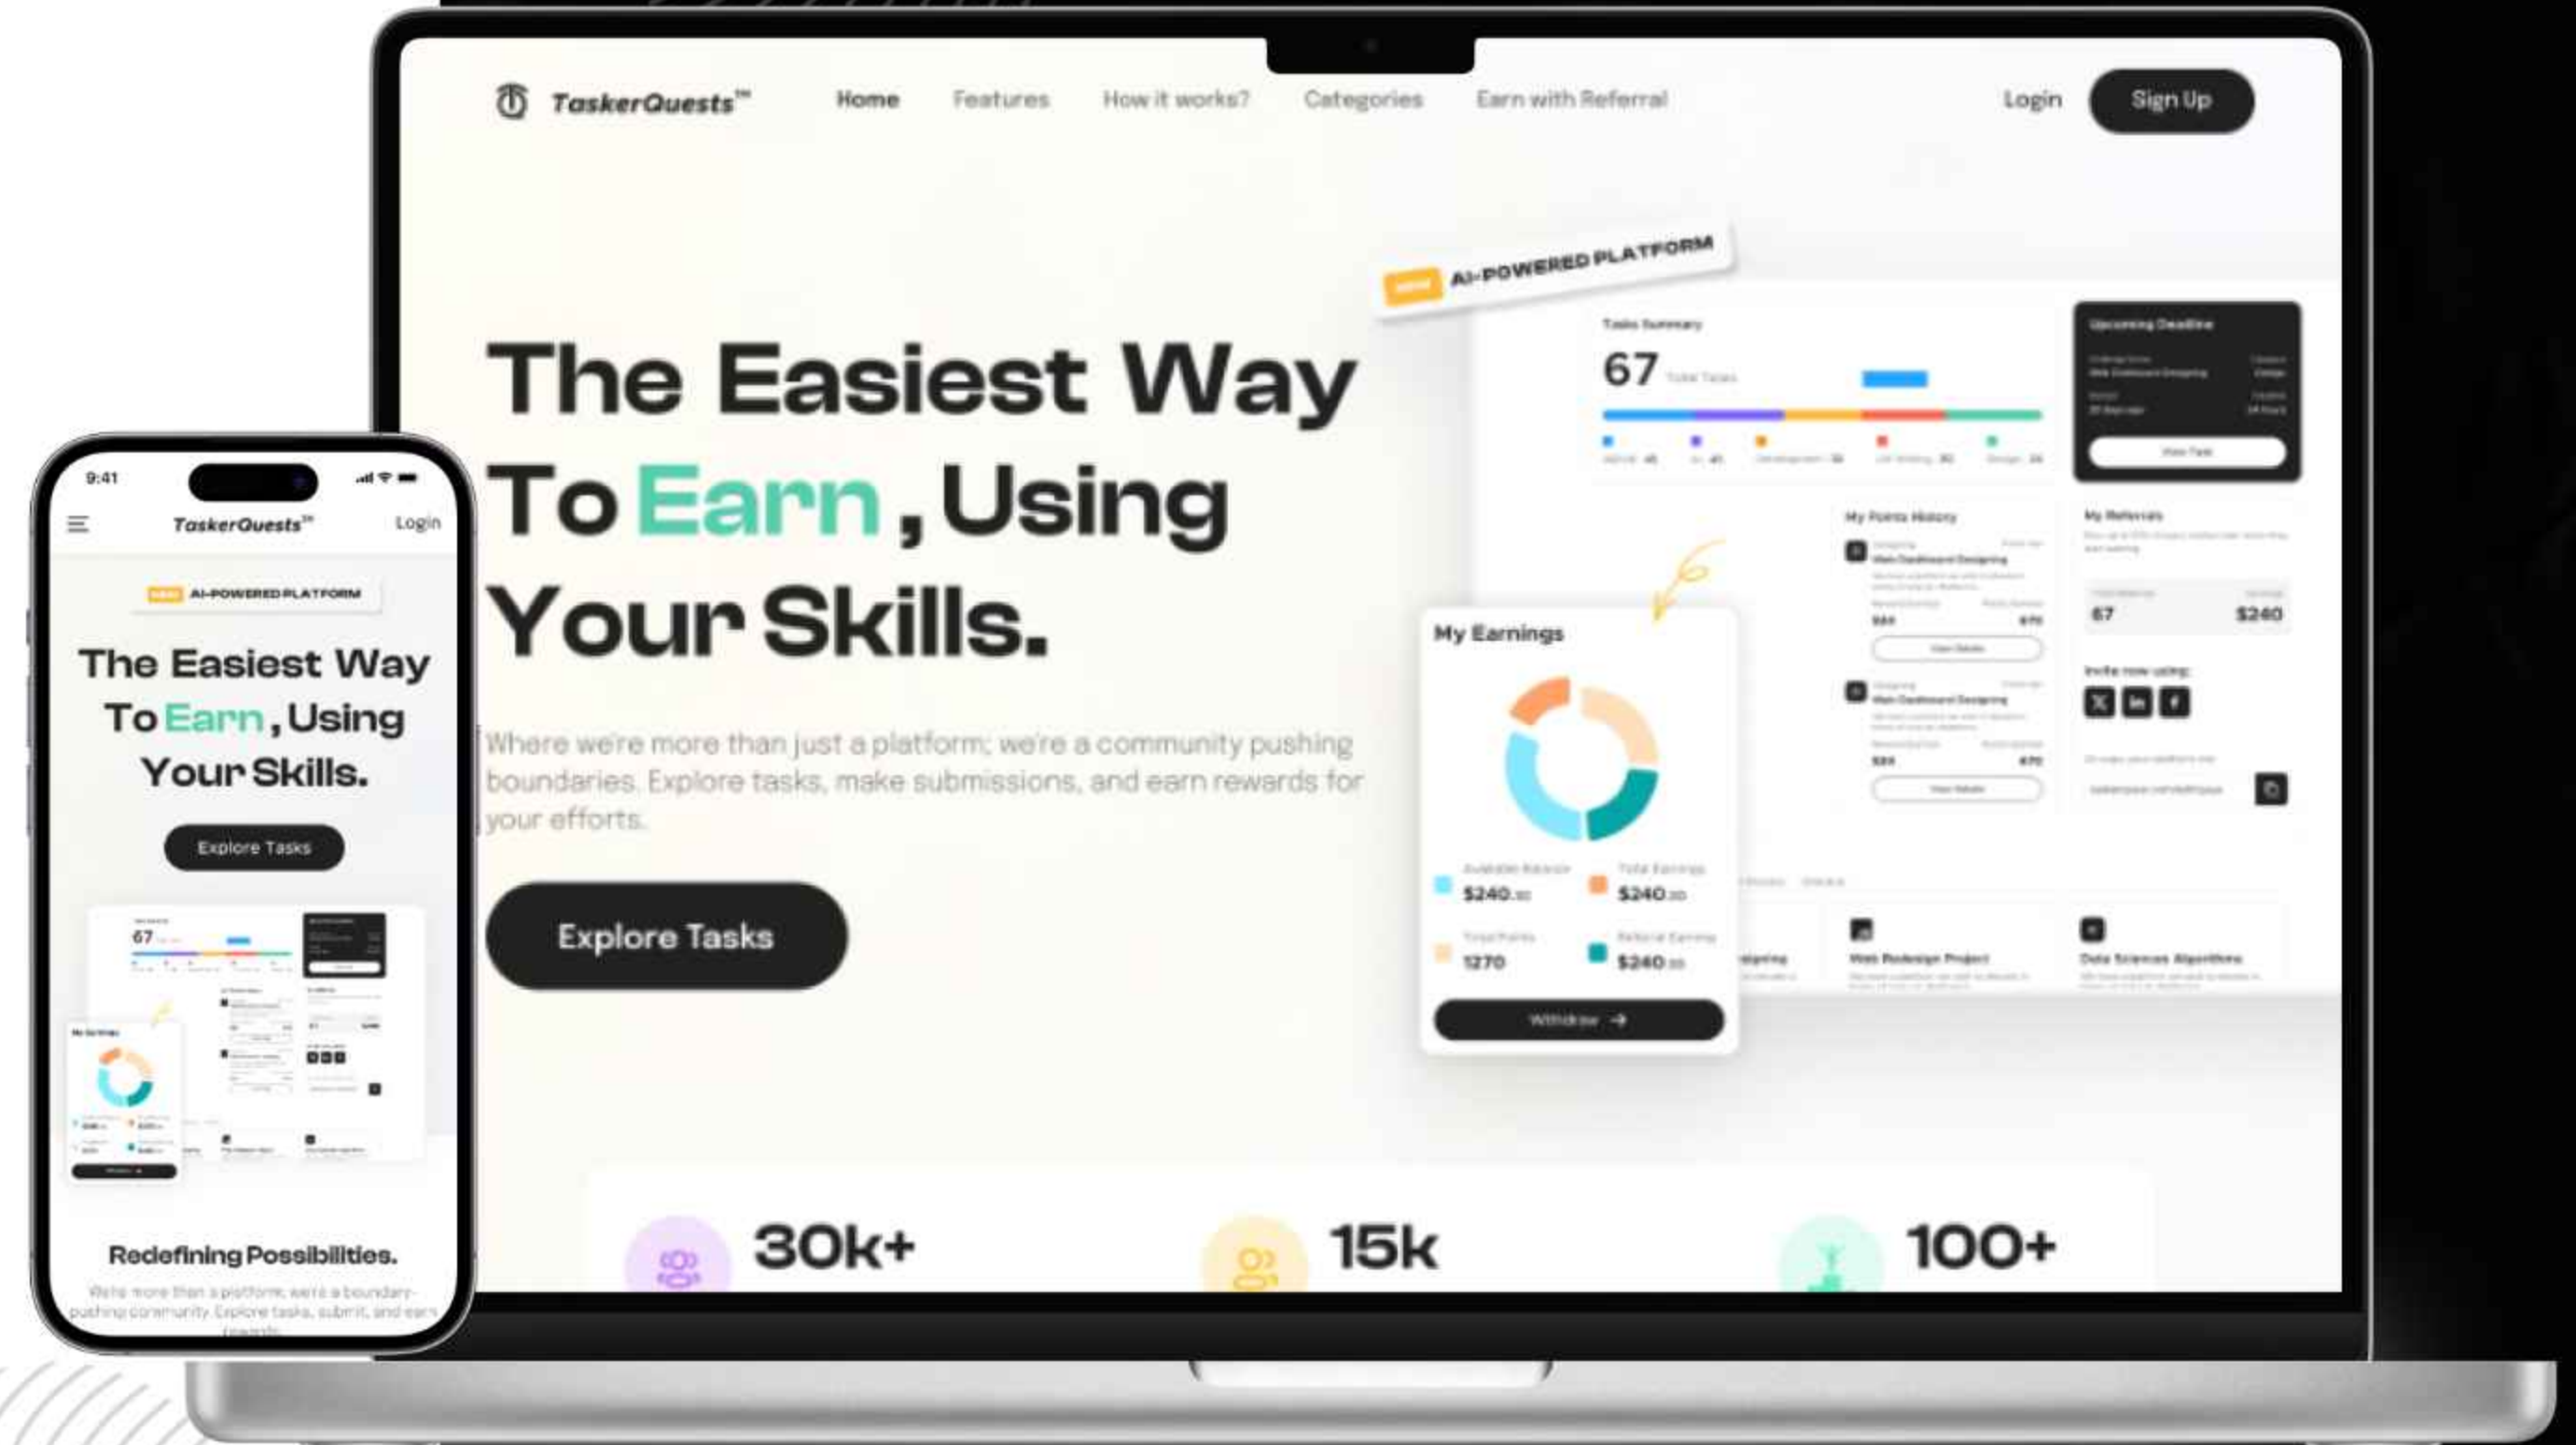

Stop Talent: Freelancing Platform

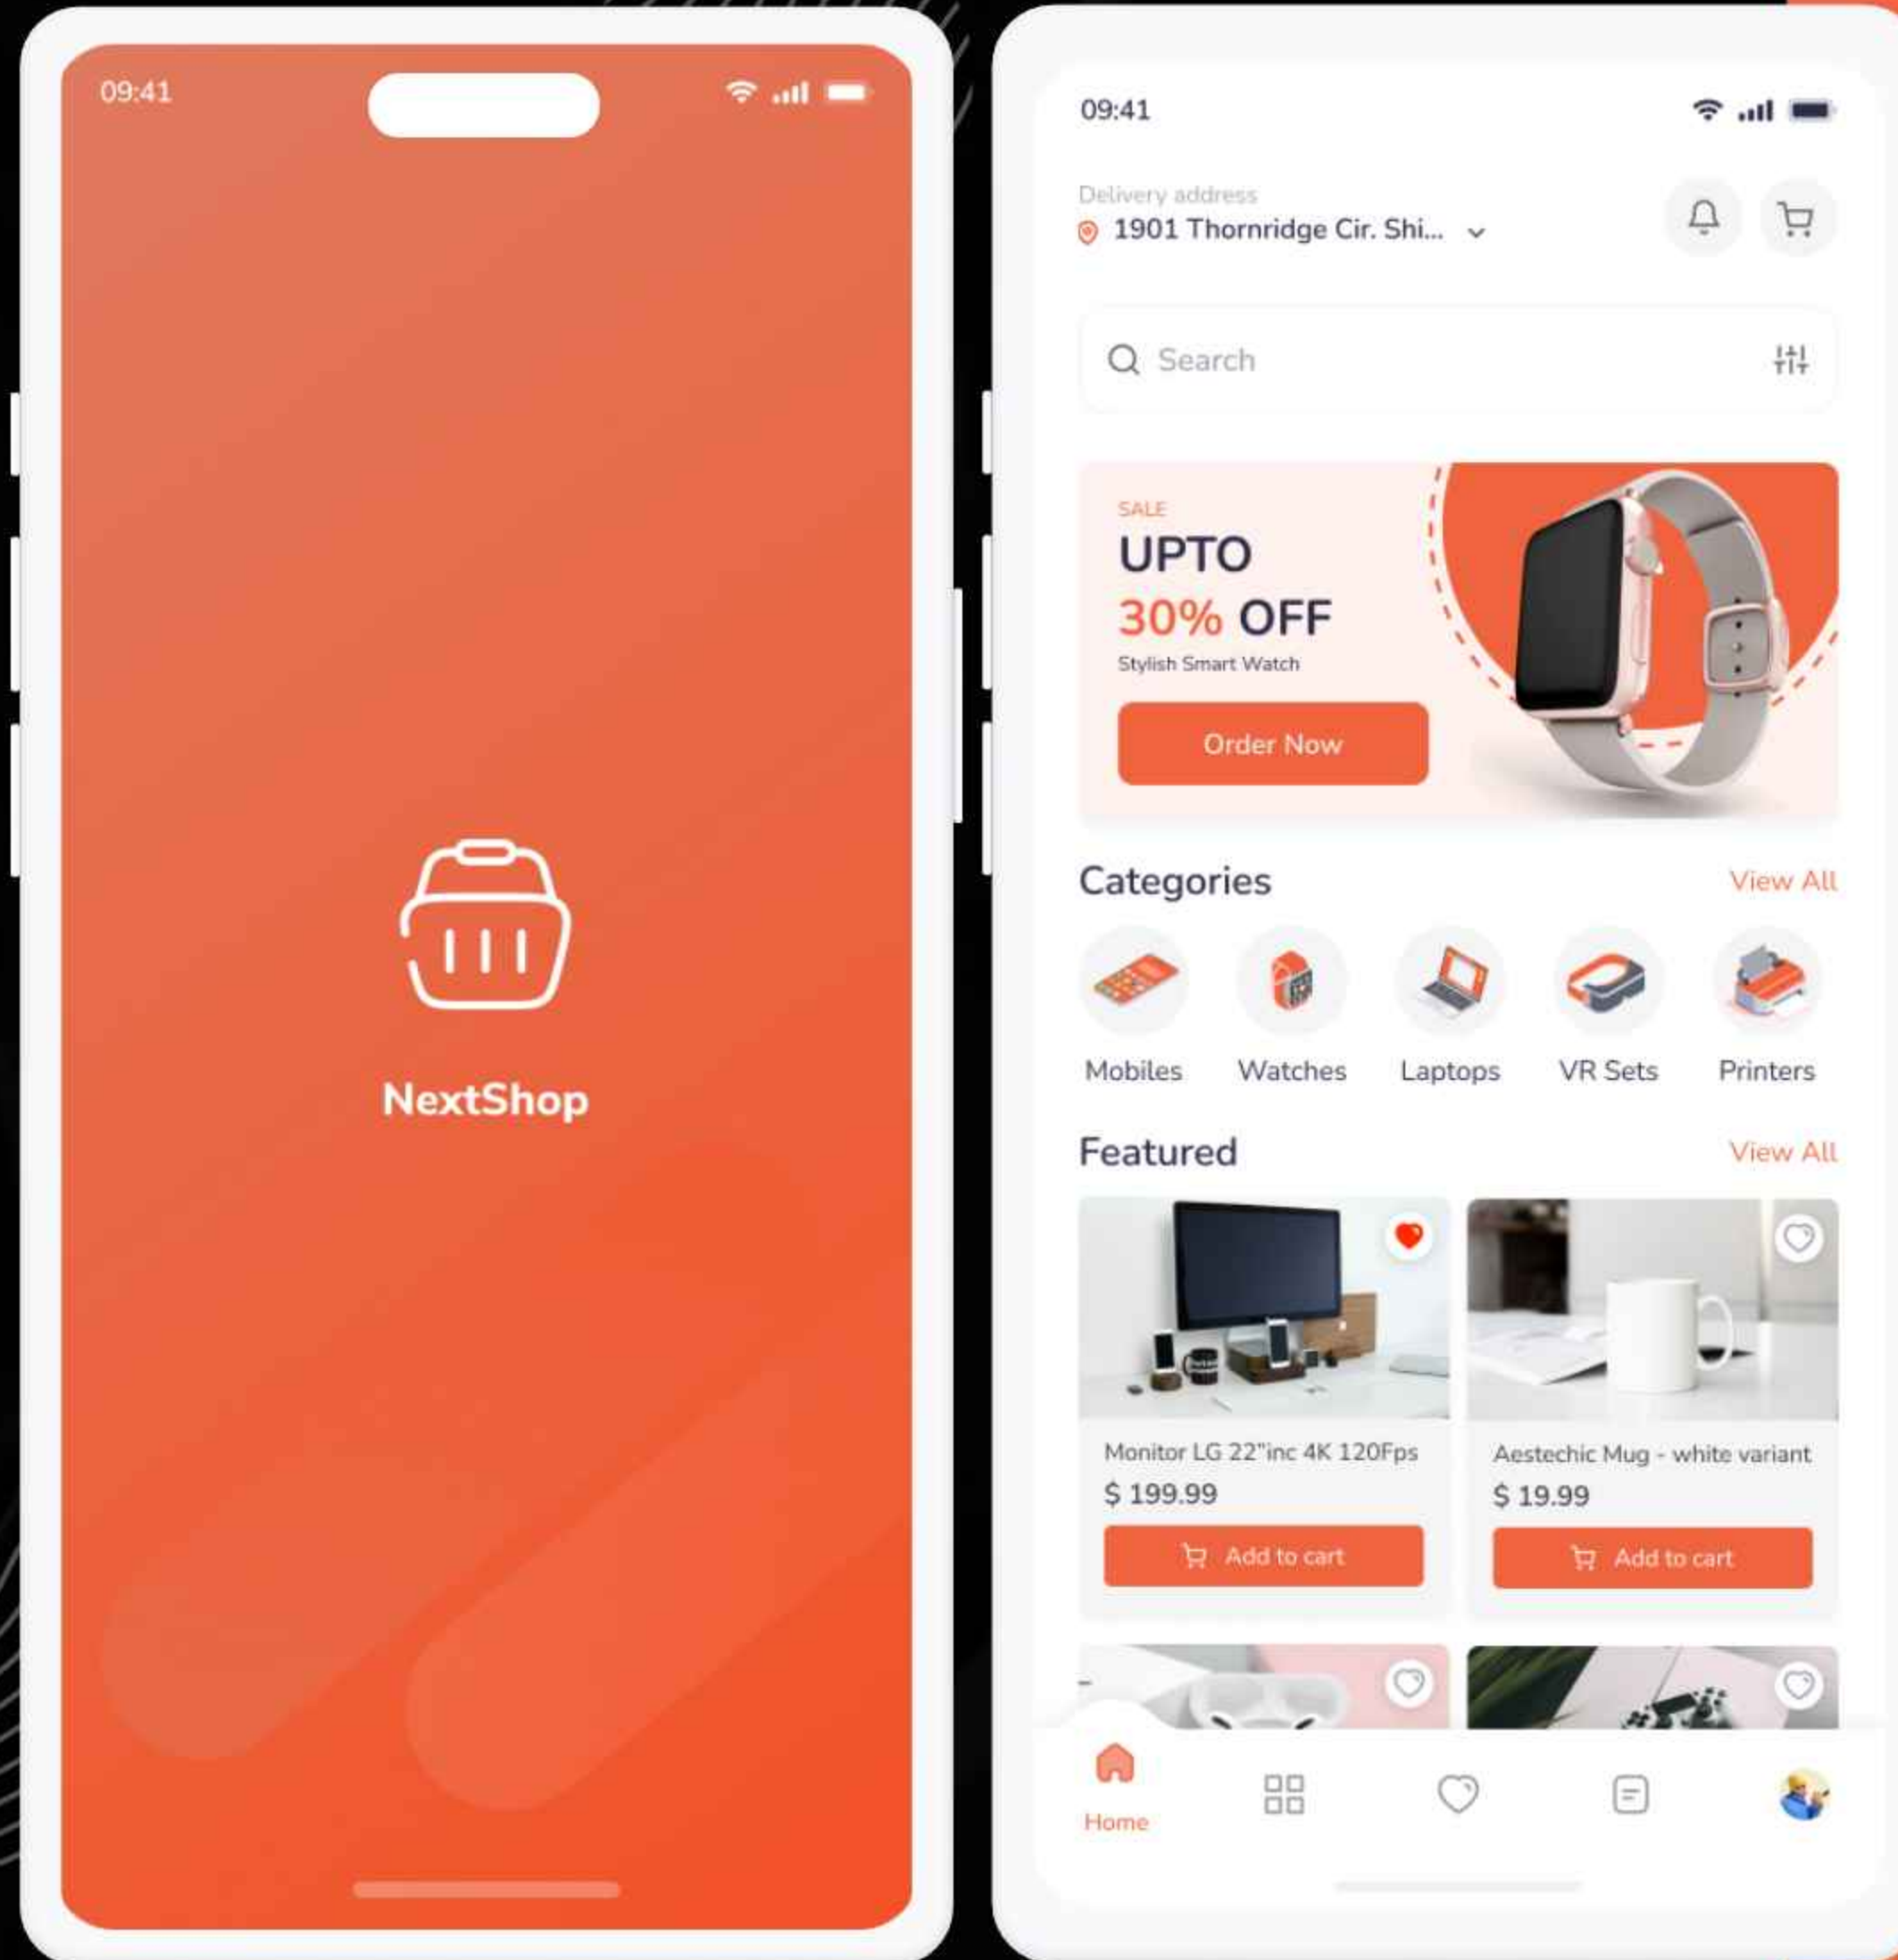

StopTalent is a dynamic freelancing platform where freelancers can search for projects and employers can post and hire talent. It offers a seamless experience for both parties, with comprehensive project management tools to ensure efficient collaboration and successful project completion. StopTalent simplifies the hiring process and enhances productivity for freelancers and employers alike.

Ez Tasker

Ez Tasker is an innovative freelancing platform where various jobs are posted, and freelancers can participate by submitting their entries. Each project is evaluated on a 10-point scale. If a freelancer's project receives a score of 9 or above, 70% of the project amount is distributed among all freelancers who achieved this score. This unique approach rewards collective effort and ensures that top-quality work is recognized and compensated fairly.

NextShop

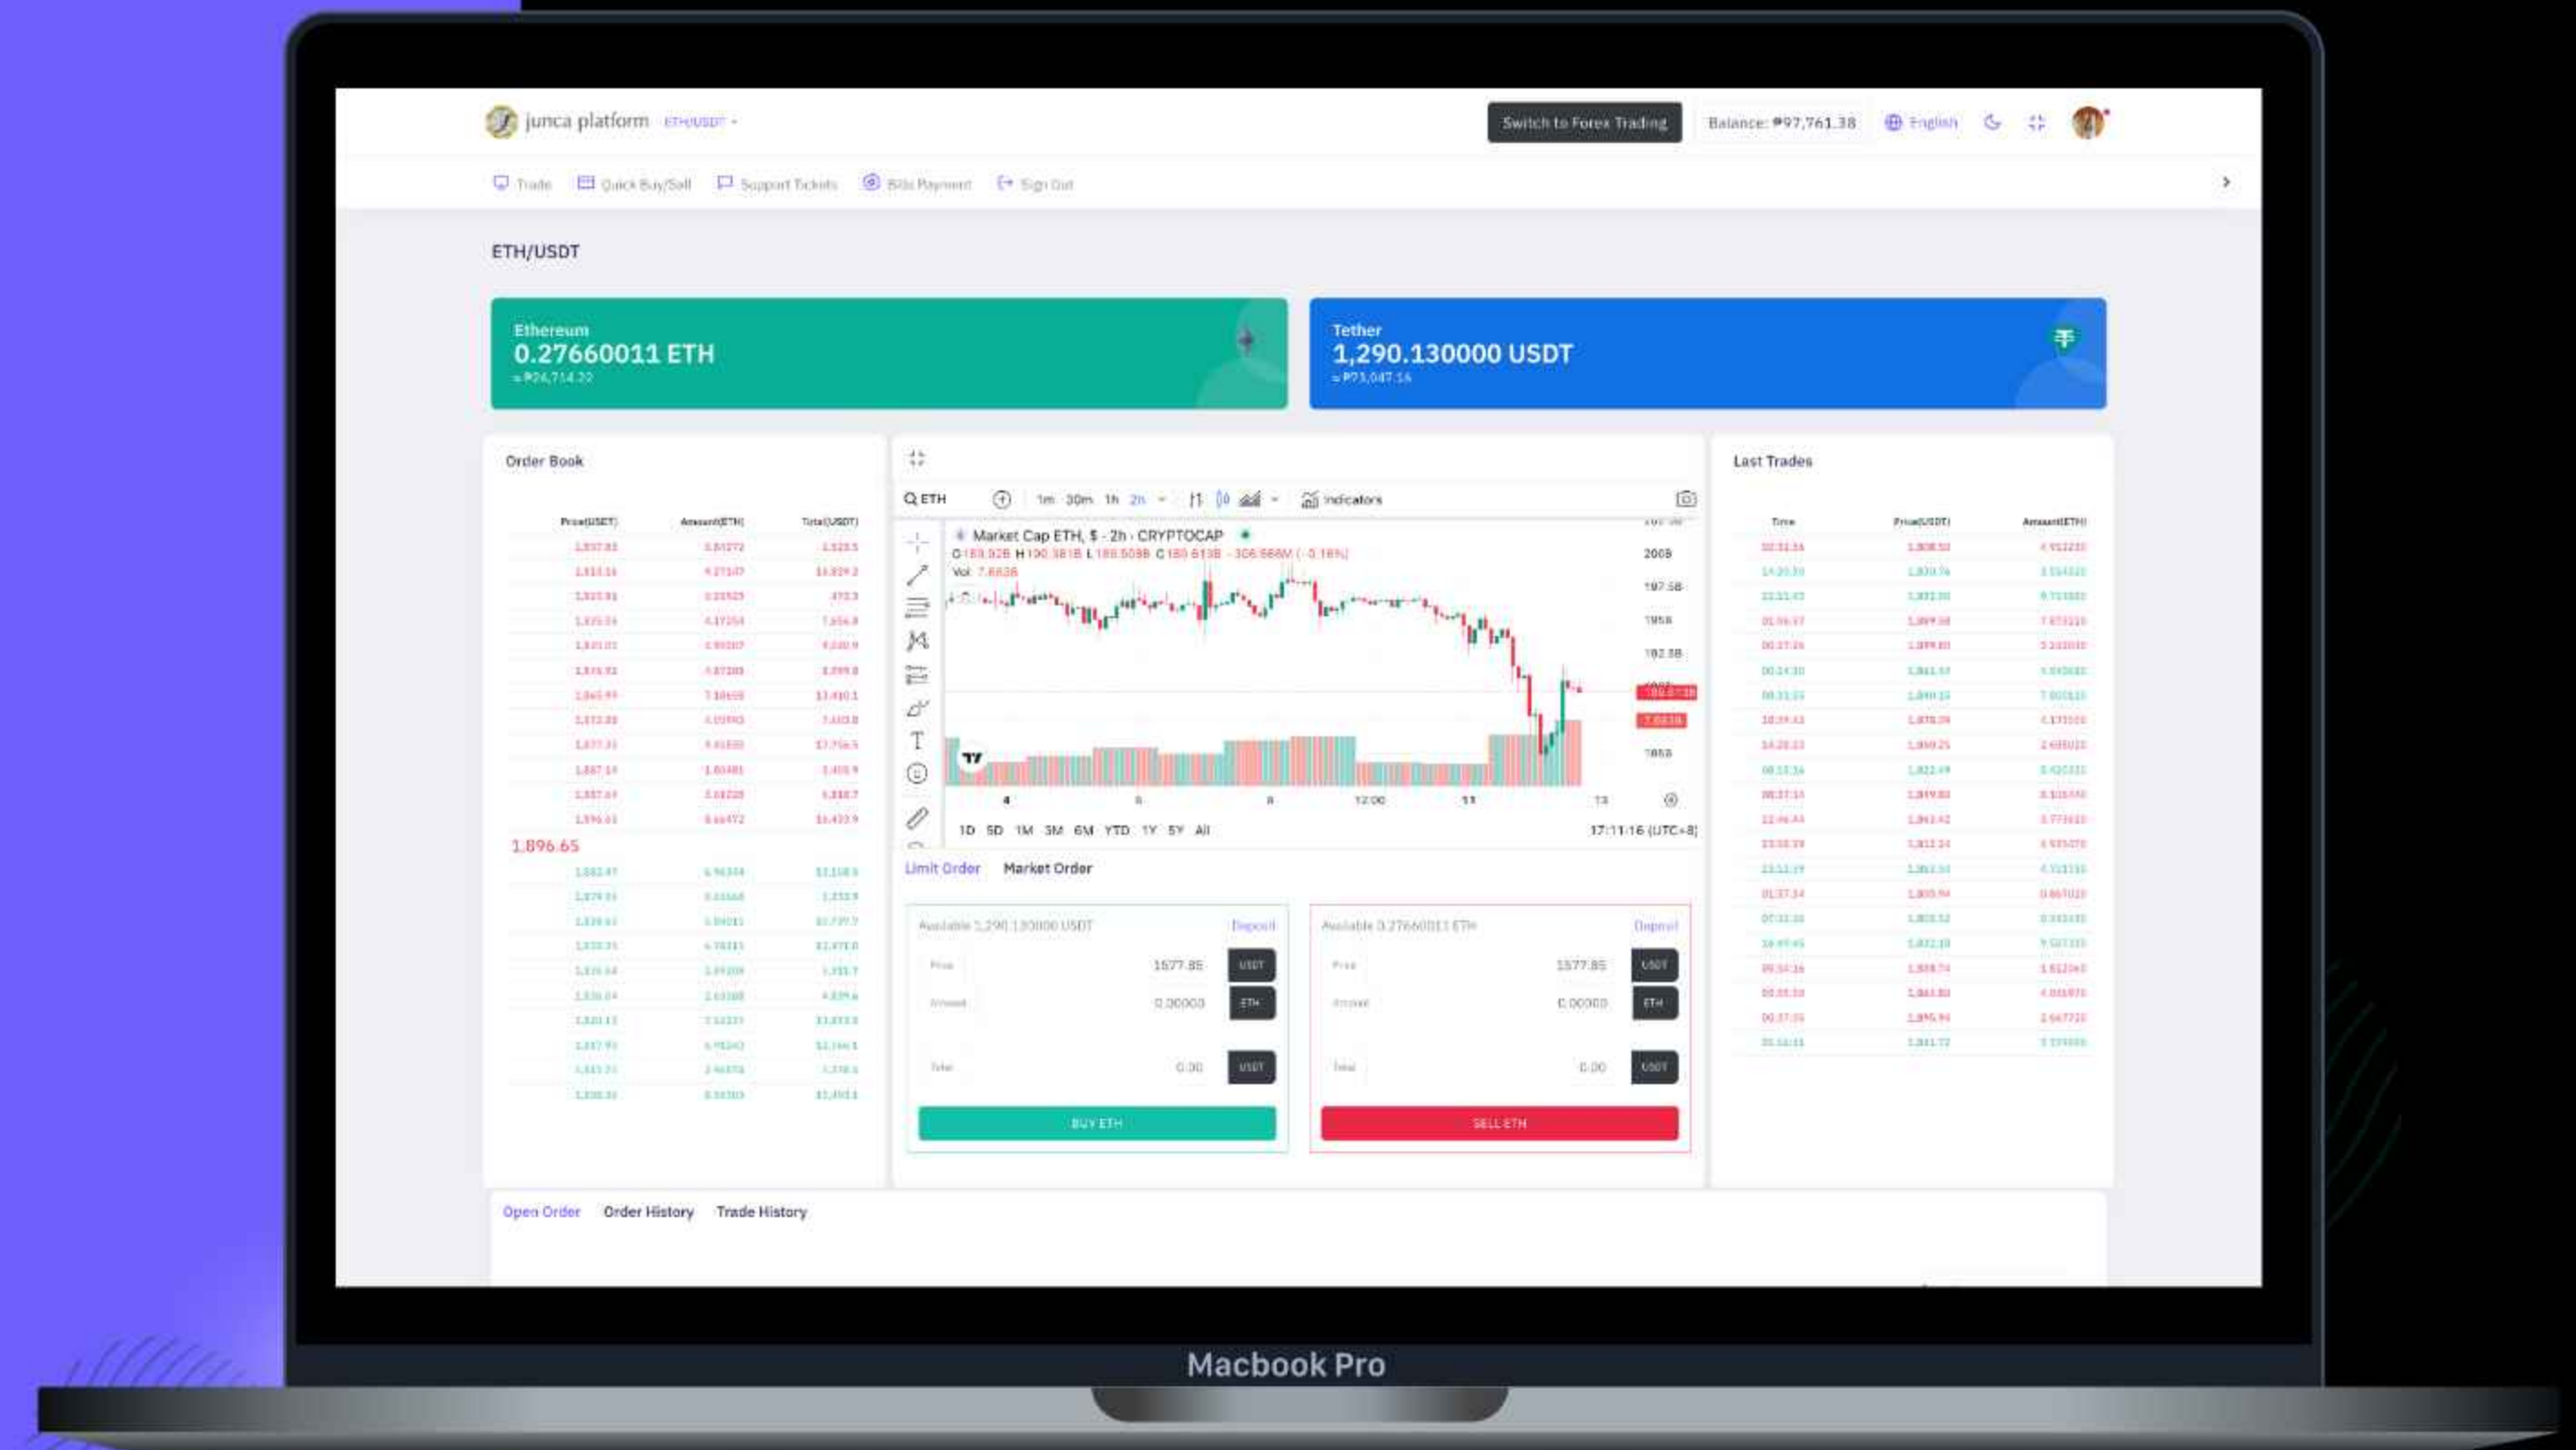

Nextshop: Ecommerce

Our Ecommerce App offers a secure, comprehensive shopping platform with a wide range of products and user-friendly features. Enjoy seamless transactions with robust security, create wishlists, track orders in real-time, and receive personalised recommendations through your own shopping profile. Join us to transform your online shopping experience, where convenience meets security and personalization, catering to all your needs from the latest gadgets to everyday essentials.

JuncaTrade

Junca Trade-Spot Trading Engine

JuncaTrade specializes in spot trading, facilitating the immediate exchange of digital assets at prevailing market rates. Our platform operates within spot markets, ensuring direct asset ownership for traders. At JuncaTrade, we empower users to seamlessly buy or sell digital assets on exchanges, fostering market liquidity and enhancing price discovery.
